A Introduction

Welcome to the KOI Mobilize whitepaper. Our goal is to transition users from Web 2.0 to Web 3.0, helping them understand blockchain and embrace the future of blockchain business systems. We aim to guide more people into the Web 3.0 ecosystem, achieving basic and passive income. We believe blockchain education and applications will become integral to daily life for the next 30 years. To support this, we've created the KOI Web3SOC Social Network, leveraging daily social behaviors, viral marketing, and the sharing economy to build a super network that helps users shape their future while staying informed about encrypted finance.

I. Market Gap and Challenges

Blockchain is often associated with Bitcoin, a major financial innovation. However, most people have a limited understanding of Bitcoin's technical structure. As of 2022, there are 300 million cryptocurrency owners worldwide, and over 18,000 companies accept cryptocurrencies as payment. Notably, the global population surpassed 8 billion on November 15, 2022.

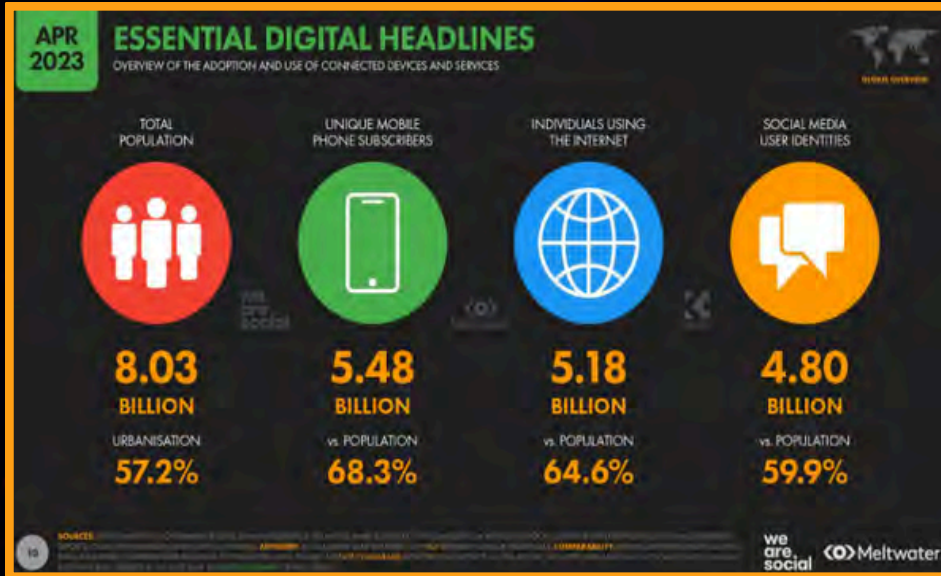

Attached is a graph from a 2017 report that accurately predicted the global population would surpass 8 billion by 2022, with continued growth expected. From a business perspective, emerging markets present immense demand, as seen in the rising number of blockchain-based wallet registrations. The increasing adoption of Web 3.0 technologies—from token investments to metaverses—highlights vast commercial potential. However, a lack of education remains a significant obstacle. Our goal is to bridge this gap through direct engagement, helping everyone understand blockchain's scalability, discover opportunities, and profit from participation.

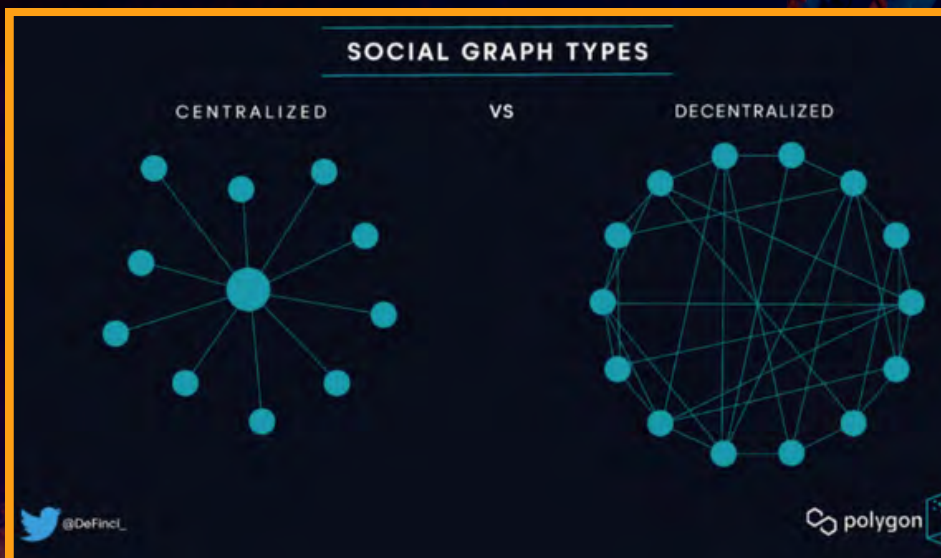

II. The Overlooked Issue of Centralization in the Internet

In the Web 1.0 era, the internet was dominated by tech pioneers and large corporations, limiting participation for most people. Web 2.0 democratized content creation but allowed internet giants to monopolize data and exploit users. Web 3.0 aims to address these issues with decentralized technologies, giving users control over their data and enabling them to benefit. Blockchain technology offers creators more opportunities and autonomy, fostering a fair and transparent internet ecosystem. KOI Mobilize focuses on solving centralization issues like creator monetization disconnect, platform value imbalance, and income concentration, aiming to empower everyone to profit from blockchain technology. As the global population grows, reliance on social media for news and entertainment increases. However, centralized platforms like Facebook, TikTok, and Twitter face criticism for data misuse and biased moderation. Web 3.0 solutions are entering this space, with decentralized social media platforms addressing these 21st-century challenges. However, scalability and mass adoption remain hurdles in transitioning to decentralized social media.

As of April 2023, there are about 4.8 billion social media users worldwide, and this number keeps growing with the spread of affordable mobile devices. While social media has become essential in daily life, it's also criticized for being as harmful as it is beneficial. Current platforms face issues like subjective content moderation, data misuse, addictive algorithms, and isolated ecosystems. To truly "fix" social media, a complete paradigm shift is needed, and decentralized social media solutions present the best chance for achieving true democratization in social interaction.

Web 2.0 companies treated social media as a single product, but Web 3.0 expands social networks across multiple layers. The social graph, mapping personal profiles and connections, forms the foundational layer. The application layer allows users to consume content and interact with this social graph, similar to Web 2.0's news feed. Blockchain technology turns the social graph into personal assets, no longer controlled by a single entity. Dissatisfaction with current social media policies and algorithms creates market opportunities for decentralized social media (DeSoc). DeSoc not only meets user needs but also drives cryptocurrency adoption while addressing gaps in existing products.

B Solving problems is an opportunity for business.

Web 3.0 currently focuses on financialization and transferable assets. However, many mainstream economic activities, such as "unsecured loans" and "personal branding," rely on non-transferable social relationships built on trust. In May 2022, Vitalik Buterin co-authored a paper introducing "Soulbound Tokens" (SBTs), non-transferable tokens bound to a wallet. Any institution or individual, like an alma mater, employer, or DeFi platform, can issue SBTs to a wallet, representing various aspects of one's social identity.

Building on this, we pioneered the Watch-To-Earn concept as a fully integrated blockchain education and application company. The KOI Web3Soc Social Network, powered by blockchain, aims to:

- Assist promising creators in realizing their dreams.
- Build a social platform that champions freedom of speech.
- Achieve a fair and equitable distribution mechanism.

In the internet era, users generate most of the value, yet platforms reap the majority of profits. While some countries have initiated antitrust actions, others propose upgrading to Web 3.0, where users own their data, and blockchain technology drives the revolution.

C Different business models yield different profit models.

Human society has always been centered around communal living, not solitary existence. The internet has expanded this by creating new forms of communication, opportunities, and business models in the realm of connectivity. As time moves forward, we anticipate the emergence of a new social business model integrating the internet with blockchain technology: the Social Media Network.

I. Similarities and Differences

When discussing business models across major social media platforms, we find that everything stems from technological innovation, combined with various societal needs.

Facebook

- **Advertising Revenue:** Facebook's primary revenue comes from displaying targeted advertisements. Advertisers can reach specific audiences based on users' interests, behaviors, and data, enhancing ad effectiveness and return on investment.
- **Data Sales:** Facebook collects, analyzes, and processes user data, creating valuable insights. It can sell this data to companies or organizations for market research, targeted advertising, and user analysis, generating significant revenue.
- **Virtual Goods and Games:** Facebook also earns revenue through the sale of virtual goods and services in games and applications, allowing users to enhance their gaming experience or social interactions.
- **Paid Services:** Beyond its free features, Facebook offers premium services, such as advertising promotions and advanced analytics, generating additional revenue through user fees.

X

- **Advertising Revenue:** X primarily generates revenue by displaying targeted advertisements on its platform. Like Facebook, X allows advertisers to reach specific audiences based on users' interests, behaviors, and other data, improving ad precision and effectiveness, thus boosting return on investment.
- **Data Sales:** X collects and analyzes user-generated data, such as posts, interactions, followers, and interests. This valuable data can be sold to companies or organizations for market research, targeted advertising, and user analysis, generating significant revenue.
- **Promotion Services:** X offers promotion services like promoted tweets, accounts, and trends, enabling users to reach a wider audience. These services are typically paid, providing X with an additional revenue stream.
- **Data Licensing Fees:** Beyond direct data sales, X can generate revenue by licensing its data to third parties, such as research firms, data analytics companies, or financial institutions, for their own analysis and research.
- **Partnership Relations:** X also earns revenue through partnerships with other companies or organizations. These collaborations may involve advertising, sponsored events, brand promotions, and other arrangements, creating additional income sources for X.

YouTube

- **Advertising Revenue:** YouTube's primary revenue source comes from displaying ads on video playback pages, including pre-roll, mid-roll, post-roll video ads, and banner ads. These ads are targeted based on users' interests and behaviors, enhancing ad effectiveness and return on investment.
- **Subscription Service:** YouTube offers a subscription service called YouTube Premium, which provides ad-free viewing, offline downloads, background playback, and more. Users pay a monthly fee for these premium features, generating additional revenue for YouTube.
- **Copyright Partnerships:** YouTube partners with content creators, allowing them to publish original content and share in advertising revenue. This model helps creators earn income while attracting more content and traffic to the platform.
- **Joint Marketing and Brand Partnerships:** YouTube collaborates with brands and advertisers on joint marketing campaigns, brand promotion videos, and sponsorships. These partnerships provide YouTube with sponsorship fees or partnership revenue, adding to its income.
- **YouTube Premium Original Content:** YouTube offers exclusive original content to Premium subscribers, often produced by well-known creators or YouTube-signed producers. This content drives additional subscription revenue and enhances brand exposure.

Instagram

- **Advertising Revenue:** Instagram generates revenue by displaying ads in various locations, including users' homepages, stories, explore pages, and search results. Ad formats include image ads, video ads, and carousel ads. Advertisers can target their audience based on interests, behaviors, and other data, improving ad effectiveness and return on investment.
- **Promoted Posts:** Instagram allows individuals and brands to promote posts through sponsored content. These posts, often shared by social influencers or brand ambassadors, aim to attract followers' attention and promote specific products or services, providing income or rewards to those who publish the promoted content.
- **Sponsored Content:** Instagram offers sponsored content opportunities, where brands collaborate with content creators or influencers to produce promotional material. This collaboration enhances brand exposure, with brands compensating creators or influencers for their cooperation.
- **Shopping Feature:** Instagram's shopping feature lets users browse and purchase products directly on the platform. Brands can set up product catalogs, and users can buy products via tags or shopping posts. Instagram earns revenue by taking a percentage of sales from merchants.
- **IGTV and Instagram Live:** IGTV and Instagram Live allow content creators and brands to promote and monetize through long-form videos, live events, or fan engagement, helping them attract followers and generate revenue.

TikTok (Overseas Version)

- **Advertising Revenue:** TikTok generates revenue by inserting ads into users' video feeds, typically in the form of short videos. These ads include native ads, branded challenges, and brand collaborations. Advertisers use TikTok's platform to target audiences based on interests, behaviors, location, and more.
- **Brand Partnerships:** TikTok collaborates with brands to launch branded challenges, events, and sponsored content, enhancing brand awareness and user engagement. These partnerships promote products or services through interactive experiences with users.
- **Gift Revenue:** TikTok earns revenue through its virtual gifting feature, where users purchase virtual gifts to send during live streams, comments, or direct messages. TikTok takes a percentage of the revenue from these purchases.
- **Social Commerce:** TikTok's social commerce features allow users to buy products directly on the platform. Brands can set up shops or post product links, and TikTok takes a percentage of the sales made through these transactions.
- **Platform Service Fees:** TikTok may also generate revenue by charging platform service fees for advanced account features, increased advertising budgets, and other services.

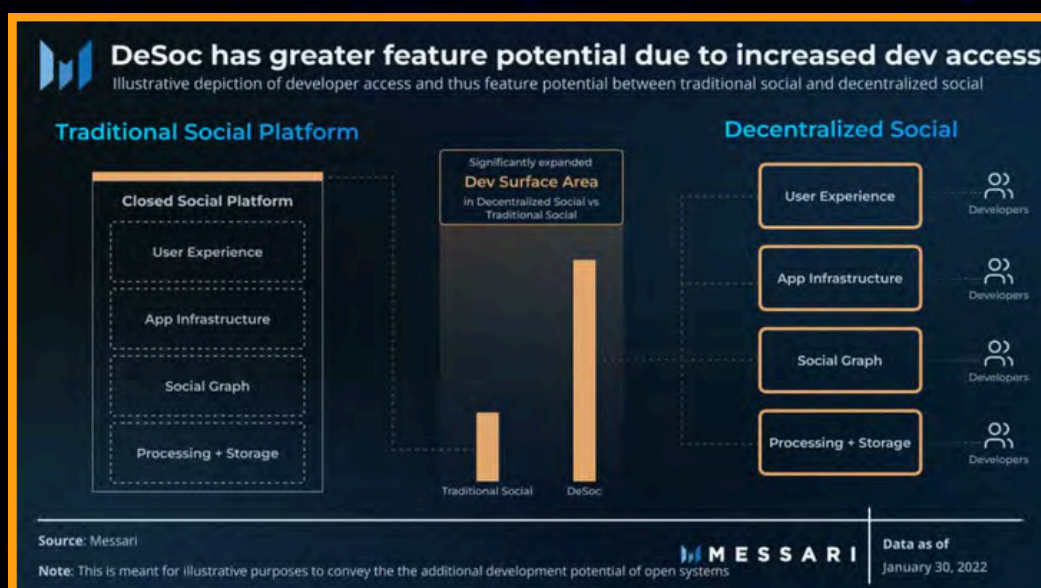

XiaoHongShu

- **Advertising Revenue:** Xiaohongshu generates revenue by displaying ads in users' content feeds, focusing on products or brands that align with users' interests. These ads, presented as videos, images, or text, are targeted through Xiaohongshu's advertising platform based on user interests, behaviors, and other data.
- **Brand Partnerships:** Xiaohongshu partners with brands to launch campaigns, themed events, and product promotions, enhancing brand awareness and user engagement. These collaborations help brands interact with users, increasing exposure and promoting products or services.
- **Gift Revenue:** Xiaohongshu earns revenue through its virtual gifting feature, where users purchase and send virtual gifts in comments or private messages. The platform takes a percentage of the revenue from these purchases.
- **E-commerce Platform:** Xiaohongshu provides a social e-commerce platform where users can directly purchase products. Brands and merchants set up stores or post product links, and Xiaohongshu earns a percentage of sales from these transactions.
- **Paid Content:** Xiaohongshu offers paid content such as exclusive readings and courses. Users pay a fee to access this content, providing an additional revenue stream for the platform.

The Web 2.0 business model primarily depends on advertising revenue, user data collection and analysis, and subscription fees for platform services. However, this model has flaws and inequalities, including privacy concerns, ad abuse, and platform monopolization of user data. Blockchain technology can address these issues and enhance the Web 2.0 model in the following ways:

- Blockchain technology can enhance the Web 2.0 business model by enabling decentralized data ownership. This allows users to control their own data, significantly reducing data abuse and privacy concerns.
 - The KOI social network connects DeSoc with Web 2.0 internet celebrities' IPs, allowing users to earn rewards for their content. On the KOI Web3SOC Social Network, users of any age or race can freely showcase their talents and create their own works, making it a prime platform for creators who value freedom of speech.
 - Users can earn rewards for creating any type of content, with fans supporting creators through subscriptions and receiving special rewards.
 - Once creators have enough subscribers, they benefit from tangible support from their fan base.
 - Businesses can also use the KOI platform to build support from loyal members for their companies.

KOI Mobilize facilitates personal brand development, creating opportunities for indirect profit generation. Additionally, we're dedicated to promoting global blockchain assets with KOI NFT, empowering all NFTs.

- **Cryptocurrency Incentive Mechanism:** Blockchain technology enables platforms to reward users with cryptocurrency for creating high-quality content, engaging in discussions, or sharing valuable information. This incentivizes active participation and contribution.
 - KOI Network users, on the other hand, can enjoy more direct feedback and rewards.
- **Transparent Advertising Model:** Blockchain enhances advertising transparency using smart contracts to record ad placements, clicks, and conversions. This traceability ensures fair transactions, reduces fraud, and improves ad effectiveness.
- **Decentralized Social Networks:** Blockchain technology supports decentralized social networks that reduce data monopolization and increase user control, leading to more open, transparent, and equitable social platforms.

D Realise-Business 5.0 Era Facilitates - Create a Personal Brand World

The solution offers a business opportunity, as the global commerce landscape has significantly transformed over the last three to four decades, shifting from low productivity to surplus capacity.

Business	Thinking patterns	Activities	Revenue Stream	Market
Business 1.0	Profit margin	Barter Age	Physical products	Seller's Market
Business 2.0	Single product in bulk	The business innovation brought about by mass production	Traditional internet	Third-party market
Business 3.0	Value-added services	The business innovation in the internet age	Product value-added	Buyer's market
Business 4.0	Influence	Business transformation brought about by ecological synergy	Emerging Social Media	Credit market
Business 5.0	Internet of Things (IoT)	Emphasis on social responsibility and sustainable development	Personal Branding - Internet of Things	Information resource market

- Business 1.0 Era: Focused on production during the Industrial Revolution, with competition based on product quality and efficiency.
- Business 2.0 Era: Centered on market orientation from the early to late 20th century, emphasizing consumer feedback and the importance of marketing.
- Business 3.0 Era: Marked by the rise of the internet from the late 1990s, transforming business models to enhance online communication and e-commerce.

- Business 4.0 Era: Current era of digital transformation, utilizing AI, big data, and IoT to improve efficiency and innovation.
- Business 5.0: Future model building on Business 4.0, prioritizing cooperation, social responsibility, and sustainable development, with blockchain enhancing security and adaptability.

I. The Advent and Impact of the Artificial Intelligence Era

Business 5.0 and Artificial Intelligence:

- Enhanced Personalized Services: AI leverages big data and machine learning to deeply understand user needs, offering personalized products and services that improve user experience and satisfaction, aligning with Business 5.0's emphasis on personalization.
- Facilitating the Sharing Economy: AI optimizes resource utilization and sharing through intelligent algorithms and platform matching, supporting the sharing economy and sustainable development principles of Business 5.0.
- Optimizing Enterprise Operations: AI helps enterprises streamline operations, enhancing efficiency and reducing costs. Automation and intelligent processes in production and supply chain management allow businesses to quickly adapt to market changes, embodying the agility Business 5.0 aims for.
- Facilitating Community Collaboration: AI enhances collaboration among individuals and organizations using intelligent tools and platforms. This facilitates the sharing of knowledge, resources, and collaborative problem-solving, driving mutually beneficial development.

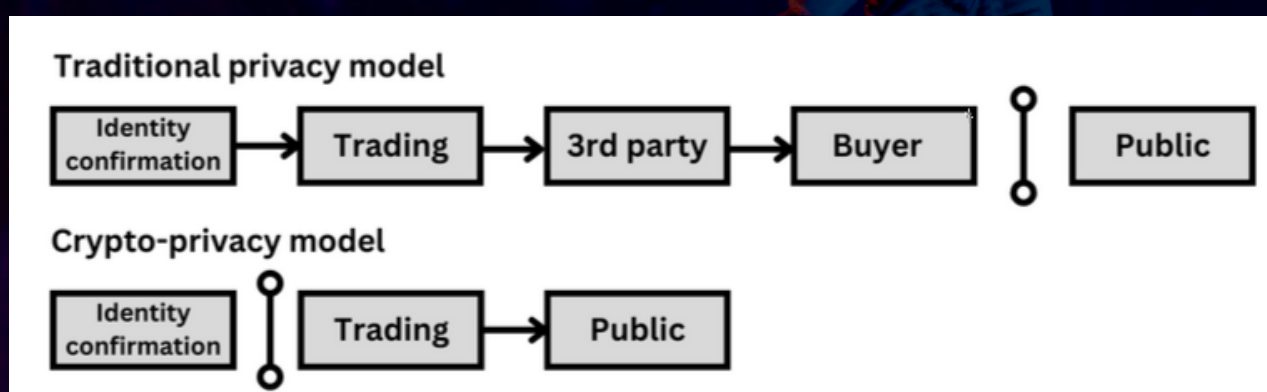

The widespread adoption of AI not only supports Business 5.0 objectives but also impacts employment, with automation potentially displacing some jobs while creating new opportunities for individuals to build personal brands and careers in an AI-driven era. Individuals can use digital platforms to showcase their unique value, provide personalized services, build communities, and promote personal brands.

II. The Trend of Integrating Blockchain Technology with Financial Services

The internet market is saturated with centralized control over individuals' free data. Blockchain technology has sparked awareness of personal data assets, a key concept in Business 5.0. Building personal brands is the next trend, and the KOI social network enables individuals to leverage Business 5.0 mechanisms to construct their own blockchain data assets.

"Regardless of who you aspire to be, persevere, for within the KOI Web3Soc Social Network, someone will inevitably recognize you."

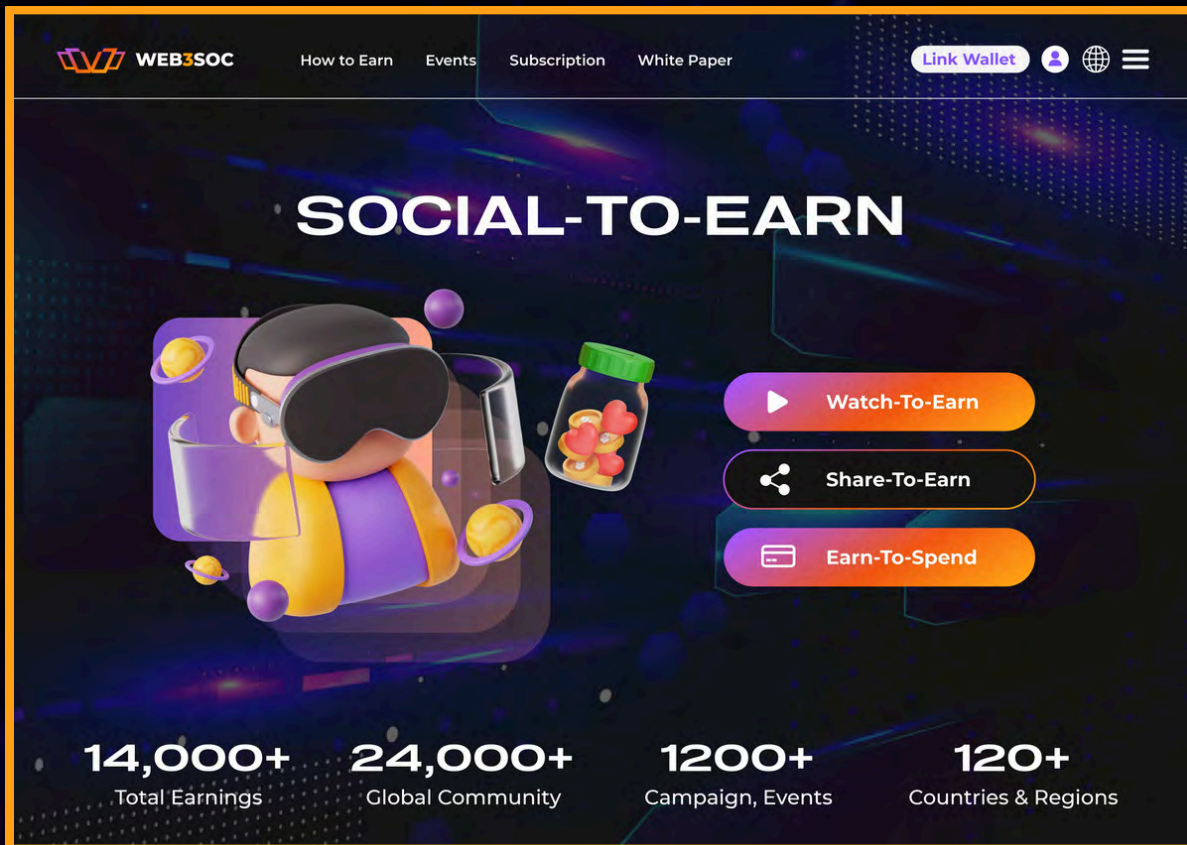

E Built-The era of disrupting personal branding begins.

As blockchain matures, traditional privacy models evolve, eliminating the need for intermediaries and allowing anonymous identity confirmation. This marks a new era. The KOI Web3SOC Social Network, operated by KOI Mobilize, combines blockchain with branding to assign value to social networks, enabling participants to discover their societal value through social engagement. We foresee a future where business becomes more straightforward.

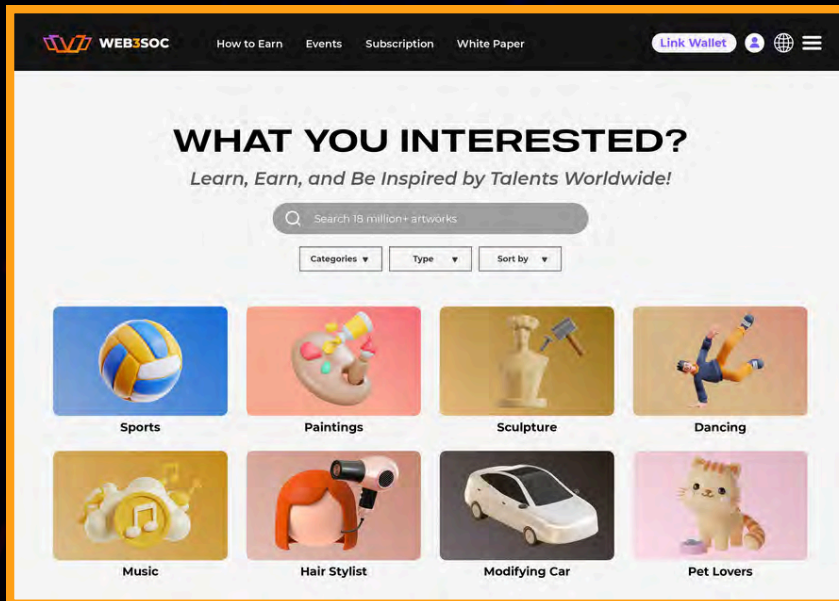

I. Every individual in this world holds significant importance.

The overarching design goal of the social network -- Establishing a lifestyle habit of possessing encrypted assets in the new era.

Early-stage customer acquisition focuses on establishing the KOI social network as a platform for nurturing personal brands. With the rise of Business 5.0, personal branding is set for explosive growth, driven by advancements in IoT, AI, and innovative business models. Every interest and profession will thrive under dedicated management.

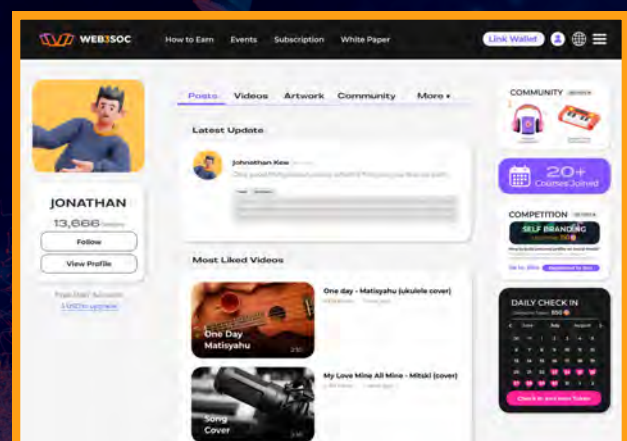

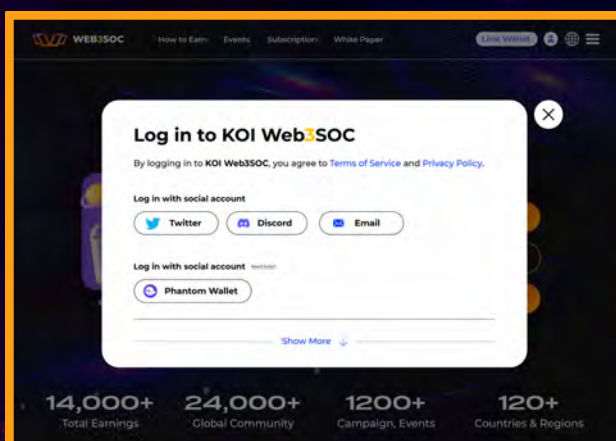

For talent, we believe it is scarce, and its utmost potential can be unleashed in the present era through technology-enabled peer-to-peer interactions.

In the first phase of the KOI Web3SOC Social Network, we aim to help users establish their personal brands.

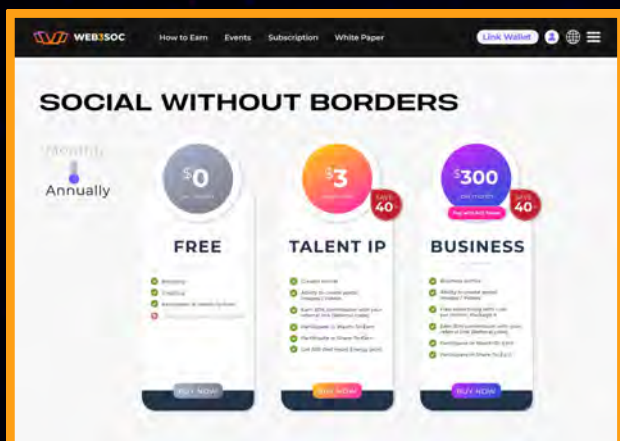

- Step 1: Register
 - Register using existing Web 2.0 accounts, complete real-name authentication, and select professional interests.
 - Invite friends from social networks and contacts; each successful invite earns 10 "Red Heart Energy" points.
 - Start with the Phantom Wallet to earn 30 "Red Heart Energy" points.

(The mechanism pushes posts or videos related to your interests into your public activity pool.)

Step2: Users have the freedom to choose:

KOI Freer:

Users can freely browse certain sections/pages.

- Daily check-ins earn 1 "Red Heart Energy" point.
- A "Watch-To-Earn" session consumes 6 to 50 "Red Heart Energy" points, depending on your choice.

KOI Red Heart Energy:

Red Heart Energy value package purchases:

- You can purchase Red Heart Energy value packages with either KOI tokens or SOL.

Red Heart Energy Amount	Purchases using KOI tokens.	Purchases using SOL.
500 Can earn ≤5000 KOI Token	5 USD worth of KOI tokens. • Free 10 Red Heart Energy	5 USD worth of SOL
2500 Can earn ≤25000 KOI Token	25 USD worth of KOI tokens. • Free 60 Red Heart Energy	25 USD worth of SOL
5000 Can earn ≤50000 KOI Token	50 USD worth of KOI tokens. • Free 150 Red Heart Energy	50 USD worth of SOL

Note: The chart above is for calculating the conversion of the first 50% token halving's Heart Energy Value to tokens.

2,500,000,000 KOI Token Watch-to-Earn

50% of tokens are allocated with ten halvings, creating scarcity and driving up token prices, allowing early adopters to earn while watching ads.

Top up Red Heart Energy to watch ads and exchange for tokens

Early purchase price:

5 USDC = 500 Hearts, earn 5000 KOI tokens by watching ads.

The earlier you participate in "Watch-To-Earn," the more tokens you'll receive.

KOI PRO (Talent IP)

Monthly plan 5 USD/Month

Annual plan 3 USD/Month

(Save 40%)

Owning a publishing platform lets you choose your professional interests. The public activity pool includes a personal tracking button, helping you make informed decisions for personal or business connections. One click equals one view, and for every 10,000 views, the platform's level increases, influencing the fair ranking of various professional interests.

KOI Business

Monthly plan 500 USD/Month

Annual plan 300 USD/Month

(Save 40%)

Advertising and promotion are key to business strategy. As a long-term merchant on the KOI Web3SOC Social Network, you'll gain sustained platform exposure and a subscription that includes \$500 worth of advertising and promotion.

- Phase Two:
Launching "Watch-To-Earn"

- Binding a Phantom or SOL wallet is optional but recommended for participating in "Watch-To-Earn" and other on-chain activities.
- Watching ads consumes 6 to 50 Red Heart Energy points, depending on the ad.
- Ways to earn Red Heart Energy:
 - Daily check-in: 1 point
 - Referral code: 10 points
 - Purchase: 500 to 5000 points
- Tokens earned can be sent to a bound SOL Wallet or allocated to a personal Crypto Debit Card.

- Phase Three:
Establishing direct relationships between businesses and individual brands (KOI Talent IP) on the SOLANA Chain. KOI Token functions as a Utility Token, maintaining its value and utility regardless of market fluctuations.

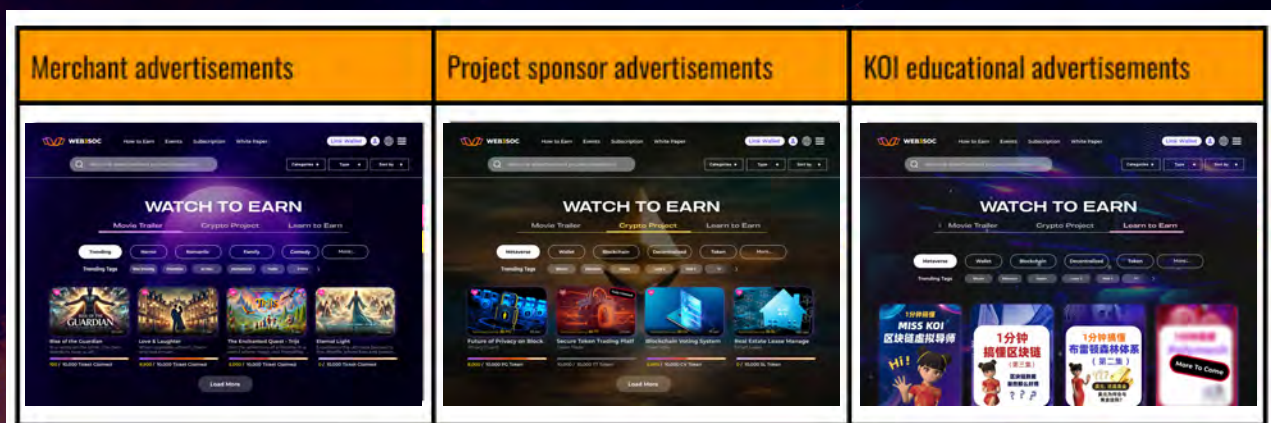

F Monetize-Disruptive advertising and packages for merchants.

Traditionally, online platforms have devised methods for participants to avoid advertisements, often through subscriptions. However, this leads to an increase in commercial advertisements as the number of platform subscribers grows. If the goal of advertising is to promote, then aligning with businesses can be more effective. In the second phase, we directly open up Advertisement Space, which serves as a practice ground for "Watch-To-Earn."

- The conditions are simple: having a sufficient amount of Red Heart Energy points grants access. Participants can then search for the advertisements they want to watch. By consuming between 6 to 50 Red Heart Energy points, they can initiate the playback of an advertisement. After watching the advertisement in its entirety, participants can click to exit the advertisement and immediately receive rewards in different tokens.
- Special Promotion: Partnering with the film distributor, watch the movie trailer and share it to receive a discount voucher for movie tickets.
- The advertisements are divided into three types:

Mode	Content	Reward
Merchant advertisements	Movie Trailer	Movie ticket discount voucher
	Merchant advertisements for various product types	KOI Token
Project sponsor advertisements	Project introduction videos	Depends on project sponsors
KOI educational advertisements	Miss KOI blockchain education advertisements & all certified level educational courses	KOI Token

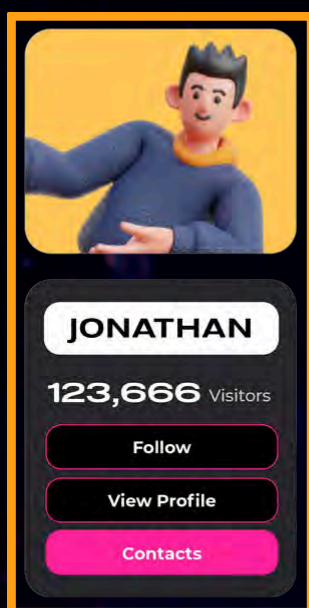

I. Learn-To-Earn VS Virtual digital persona IP — Ms. KOI

- Ms. KOI serves as the virtual instructor for our blockchain courses, delivering conceptual classes with a unique teaching style, enhancing learning enjoyment. Positioned as a leading virtual KOL, these virtual instructors are designed to become a unique asset with continuous marketing.
- There's global demand for blockchain knowledge, so all courses are taught using a virtual digital instructor (Virtual IP) in an animated movie format. This standardizes teaching methods and includes virtual instructors in traditional attire from different countries, boosting global brand credibility.
- Learn-To-Earn: Participants use Red Heart Energy points to watch educational videos and earn tokens. This initiative, promoted globally in sync with International Licensing, broadens blockchain education.
- We plan to expand into other academic fields, helping learners globally access expert knowledge. In the era of personal branding, this approach establishes authentic credentials and portfolios online.

II. Talent-To-Share naturally creates users with soul.

The potential audience is vast, with 300 million cryptocurrency owners and over 18,000 companies using it for transactions as of 2022. Despite the global population surpassing 8 billion, Web 3.0 remains underdeveloped, presenting a new frontier. However, entering Web 3.0 can be challenging for ordinary individuals. To address this, we've introduced Talent-To-Share, helping individuals build personal brands and establish reputational assets, extending into blockchain assets and ensuring no one misses out on this evolving opportunity.

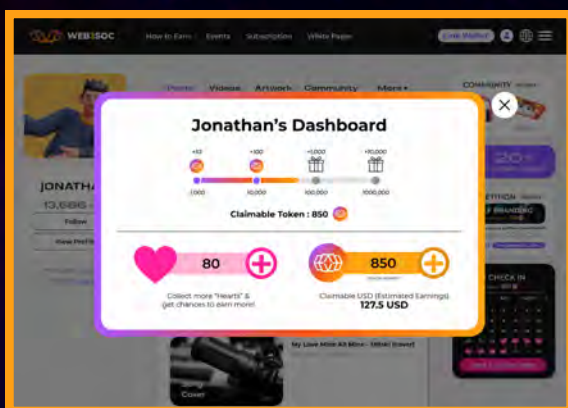

- Building both business and personal brands requires time, dedication, and careful cultivation. The KOI platform acts as a nurturing ground for brands. All KOI (Talent IP) registrations include a "Contacts" button to facilitate business collaborations and product promotions, fostering direct platform connections.
- If talent is valued, the KOI social network encourages the community to appreciate and recognize their own talents, especially in the blockchain era. Once a personal brand's "Contacts" button reaches 100,000 visitors, they directly connect with businesses and can undertake project sponsor advertisements.
- Additionally, users known as KOI Freer on the KOI Web3SOC Social Network can earn KOI tokens not only through Watch-To-Earn but also from visitor views on their posted videos, facilitated by KOI (Talent IP).

III. International Licensing of Countries

As global population and technology advance, the need for Social-To-Earn grows. Major corporations worldwide are adopting blockchain and related technologies. KOI is focused on futuristic technologies like blockchain, AI, big data, VR, and AR, crafting the KOI S2B2C business model to leverage these advancements. We are developing global market strategies and will issue International Licensing of Countries to target specific markets, using this as a channel to introduce KOI globally. Social-To-Earn on the KOI Web3SOC Social Network will be a cornerstone of our global business strategy, helping people in each country to socialize effectively.

- Watch-To-Earn: Engage with various types of advertisements, including commercial, merchant, project sponsor, and educational ads.
- Talent-To-Earn: Personal brands can showcase their dedication and hard work, gaining visibility.
- Share-To-Earn: Users spend Red Heart Energy points to share videos, increasing exposure for creators and earning additional tokens for themselves.
- Earn-To-Spend: Participants leverage earnings from platform activities for further spending within the ecosystem.

Note: Holding the International Licensing of Countries provides long-term returns from off-duty marketing income.

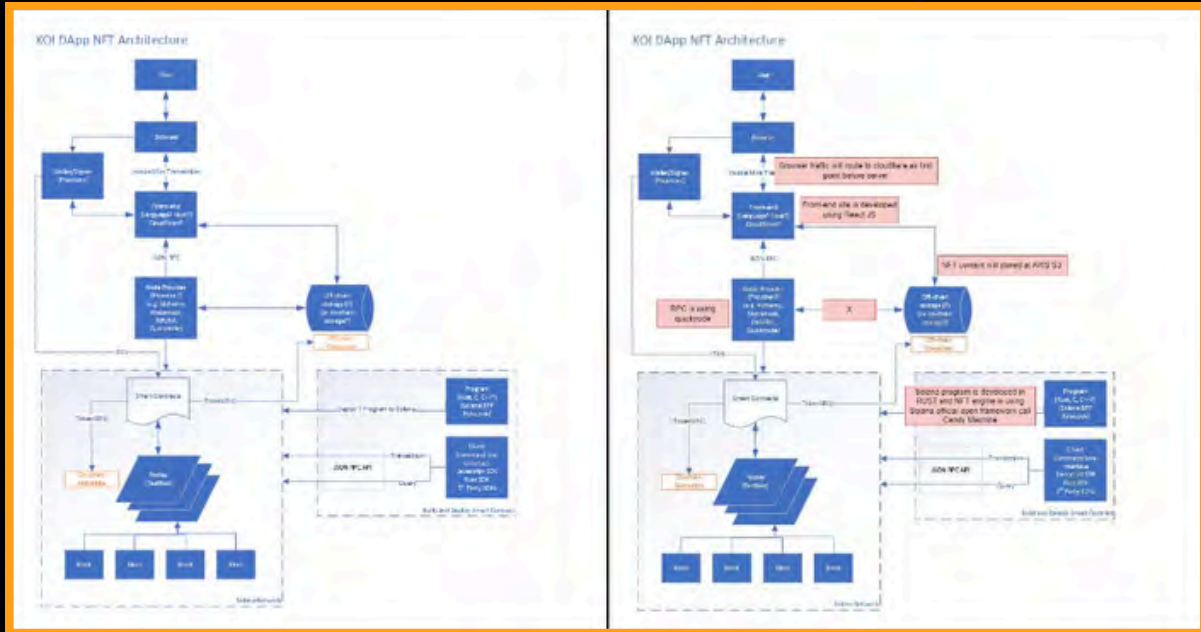

Note:

The KOI tokens earned on the KOI Web3SOC Social Network:

- Users can register using their Web 2.0 social media accounts and then securely open a Phantom wallet according to the tutorial, followed by converting the tokens for cash.
- Users with Phantom wallets can directly transfer tokens into their Phantom wallet and sell them on the secondary market. Alternatively, they can apply for a Crypto Debit Card for direct spending or store them in a UKISS Hugware wallet for staking to earn more tokens.

G 拥有-初始(Genesis) NFT

KOI DApp NFT Architecture:

- **Smart Contracts:** Utilizes smart contracts, often written in Solidity, to establish rules for NFT creation, trading, and ownership transfer on platforms like Ethereum.
- **Storage Layer:** Employs decentralized storage systems like IPFS to store NFT metadata and files such as images, videos, and audio.
- **User Interface:** Provides a user-friendly interface for users to manage NFTs, including creation, buying, selling, and transferring, along with viewing ownership and metadata via web, mobile, or desktop applications.
- **Wallet Integration:** Integrates cryptocurrency wallets allowing users to manage their assets and interact with smart contracts for NFT operations.
- **Metadata Standards:** Adopts metadata standards to ensure NFT interoperability across different DApps and marketplaces, enhancing consistency in display and interaction.
- **Marketplace and Trading Platform:** Features a marketplace for showcasing, selling, and buying NFTs, supporting transactions and auctions to facilitate user engagement.

I. Empower the Perfect Extension – Crypto Debit Cards

At the initial stage, KOI Mobilize has launched NFT empowerment, namely:

[NFT Introduction]

Genesis NFT has a total of 500 pieces (each priced at 1,000 USD).

Special Bonus for Early Adopters:

- Each of the first 100 NFT holder will receive 400,000 KOI Tokens.
- ONE Crypto Debit Mastercard
- 5% profit of Web3SOC total top-up amount each month

Standard Allocation:

- The remaining 400 NFT holders will each receive 100,000 Tokens.
- ONE Crypto Debit Mastercard
- 5% profit of Web3SOC total top-up amount each month

Shareholder profit calculation:

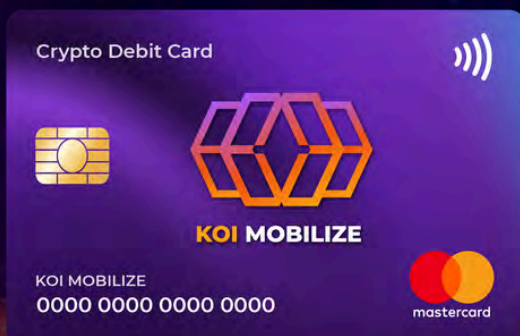

1,000,000 (number of top up transactions) X 5USD (top up amount)

=5,000,000USD X 5% (profit distribution)

=250,000 ÷ 500 (Genesis NFT)

=Node shareholders can earn \$500 each month.

II. Earn-To-Spend

The NFT held by KOI holders function similarly to shareholders, granting them short-term and long-term dividend empowerment. Additionally, the company has partnered with Mastercard to facilitate payment channels and allow NFT holders to sell KOI tokens back to the company through the provided Crypto Debit Card(Note3).

To facilitate users' access to USDC and reduce token selling pressure on the secondary market.

- The annual fee for each cryptocurrency card (charged by the credit card company) will be covered by the company for the first year. For subsequent years, the fee can be paid using Red Hearts.
- Investors can consider purchasing tokens for staking to earn additional token profits.
- Users can make online and offline payments at any time through companies that accept Mastercard.

Cryptocurrency cards are digital versions of traditional debit cards, used for transactions with digital currencies. The main advantage of cryptocurrency cards is their ability to instantly use cryptocurrency for payments, without any further steps required when making purchases in any form globally. KOI introduces GENESIS NFT as early-stage partners in the **Web 3.0** network. In addition to supporting node maintenance, owning this NFT in this phase also grants long-term profit binding to the KOI social network.

III Security Considerations

Purpose of KOI Mobilize: The primary goal of KOI Mobilize is to lead individuals in establishing personal brands on the KOI Web3SOC Social Network, focusing on asset-based investments that generate cash flow. Understanding and securely storing blockchain assets are crucial steps. This focus has led to a partnership with UKiss Technology Company to enhance security and develop a digital ecosystem. This ecosystem allows users to seamlessly authenticate themselves across Web 2.0 and Web 3.0 applications using their private keys.

UKISS Hugware Wallet Features:

- Each wallet has a unique serial number tied to an NFT, enhancing security.
- The "Soul Binding" feature securely stores all KOI NFTs and tokens.
- Allows for KOI token staking and random airdrops to wallet addresses.
- Compatible with receiving any cryptocurrency asset.

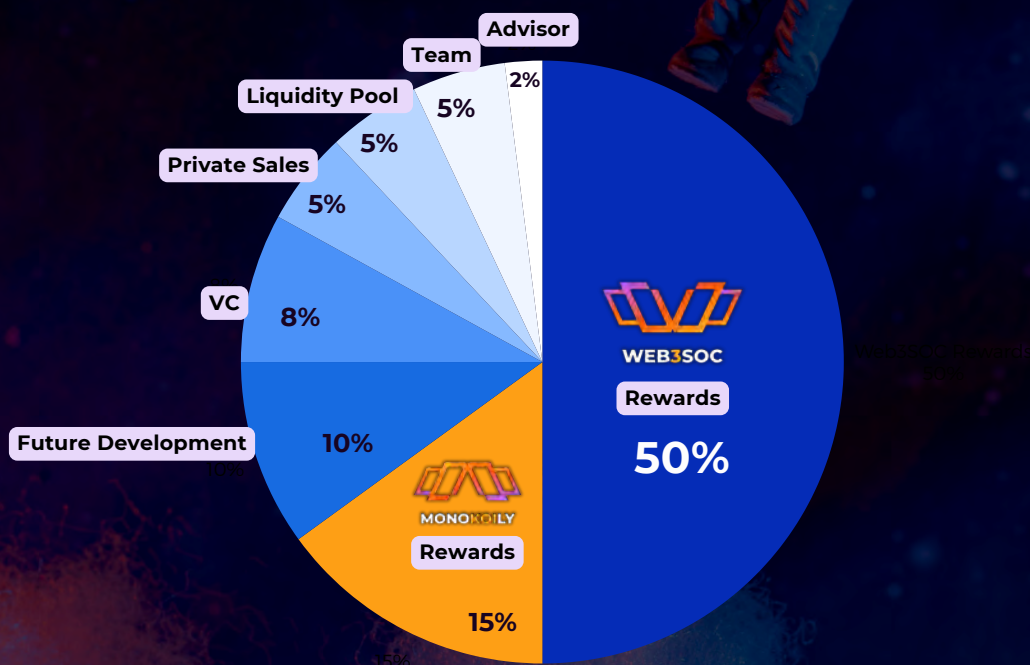

H KOI Roadmap

The company's 2026 goal is to reach 10,000,000 user subscriptions on the KOI Web3Soc Social Network. The platform directs 80% of advertising profits from merchants directly into users' wallets, thereby disrupting the operations of Web 2.0 platforms and establishing internal traffic data.

- 2024 Q2 : KOI Private Sale Phase, Development of KOI DAPP, Token Airdrop Event
- 2024 Q3 : Development of Telegram Mini-Game - MONOKOILY, Upgrade to KOI Official Website Version 2, Release of KOI DAPP Beta Version
- Q4 2024 : Launch of KOI Official Website Version 2, Release of MONOKOILY Beta Version
- 2025 Q1 : Token Listing on Exchanges, Launch of MONOKOILY, User Acquisition - Targeting 1 Million Users for MONOKOILY
- 2025 Q2 : Launch of First Version KOI Web3SOC - Focused on Film Promotion, Establish Point-to-Point Connections between Merchants and Personal Brands, Begin Introducing Advertisers, Target of 1 Million Users for Web3SOC
- 2026 : Target of 10 Million Users for Web3SOC
- 2027 : Target of 100 Million Users for Web3SOC

I KOI Token Ecosystem Distribution

The transparency in the distribution of KOI tokens includes a clear explanation of how the project allocates and utilizes its tokens. This encompasses several aspects such as:

50% - Web3Social Rewards

Social DAPP -

Mainly borrow alliances to promote and accelerate the expansion speed.

【2,500,000,000 KOI Token Watch-to-Earn】

The token allocation of 50% includes a mechanism of ten halvings. With each halving, tokens start to decrease, reducing the amount of tokens exchanged for heart energy, thereby continuously driving the token price upwards. This enables early adopters to earn money while watching advertisements.

【Recharge Red Heart Energy to watch advertisements and exchange for tokens.】

Early players' purchase price:

5 USDC = 500 red hearts, which can be exchanged for 5000 KOI tokens by watching advertisements.

The earlier participants in Watch-To-Earn, the more tokens they receive.

15% - MONOKOILY Rewards

Monokoily is a mini-game based on the Telegram platform, leveraging its vast user base for promotion and user acquisition. The game is designed to help people understand the current financial system and learn personal financial planning. With the proven potential of mini-games, the users accumulated on Monokoily will be transitioned to Web3SOC, providing the new platform with its first large wave of users.

10% - Future Development

Used to drive the project's long-term development and growth.

8% - VC

- Unlock 25% after a 3-month lock-up period, then 15% every 3 months thereafter (fully unlocked in 18 months).

5% - Private Sales

Token Sale -

- Genesis NFT 500 holders

5% - Liquidity Pool

Liquidity provision refers to the ability to buy and sell digital assets (such as cryptocurrencies) on a blockchain network, as well as the overall market liquidity.

5% - Team

Locked for 3 months, then unlocked over the following 60 months.

2% - Advisor

KOI has invited blockchain industry experts as advisors to enhance the project's overall quality.

- Unlock 25% in the 3rd month
- Unlock 15% in the 6th month
- Unlock 10% every three months thereafter, until fully unlocked in the 24th month

J Core Values

KOI Mobilize upholds the culture of the 5 major dimension to operate and create corporate value:

- Value Enhancement: We must always center our decisions around the principle of adding value.
- Growth: We take bold actions to find the best ways to increase the company's market value.
- Disruption: We adhere to the disruptive mindset of the new era, creating unique products for the benefit of participants in the blockchain ecosystem.
- Passion: We continuously innovate and always wear a smile on our faces.
- Integrity: With the user at the center, we always maintain honesty, openness, and ethics.

K Vision and Mission

- Vision: Through the **【Blockchain Ecosystem】**, create passive income and blockchain assets to help everyone achieve a "worry-free life" in a high inflationary system, enabling early retirement.
- Mission: Our mission is to establish a secure, transparent value exchange network through blockchain reward mechanisms.

M Risks and Challenges

The risks associated with blockchain investment include market volatility, technological risks, security vulnerabilities, regulatory risks, and fraud risks. Prices may experience significant fluctuations, technology may encounter issues, security vulnerabilities may lead to fund losses, regulatory uncertainty may impact the market, and fraudulent activities are also prevalent.

N Legal and Regulatory Compliance

Blockchain Regulatory Compliance in Malaysia: Blockchain projects in Malaysia must meet strict legal requirements. The Securities Commission Malaysia mandates that digital asset exchanges (DAX) obtain licenses and comply with anti-money laundering (AML) and counter-terrorism financing (CTF) regulations. The Digital Economy Act also imposes obligations on digital asset service providers (DASP) to ensure compliance. While the government supports blockchain development, projects must adhere to regulations and secure proper licensing and approvals.

Annotation

Note 1:

Data on the world population growth rate is typically sourced from international organizations and institutions, including the United Nations, World Bank, World Health Organization, etc. Data on the world population growth rate. ([Click](#))

Note 2:

Critical point: The critical point refers to the condition that a physical quantity must satisfy when an object transitions from one physical state to another, akin to the mathematical concept of a stationary point. We can find optimal values through critical points, achieving significant efficiency gains.

- Network effect: Also known as network externality or demand-side economies of scale, it's an economic and business term describing how each additional user of a product or service creates new value for other users. When network effects occur, the value of a product or service increases with the number of users utilizing it.

Note 3:

The KOI Crypto Master Debit Card([Click](#)) enables members to have more direct cash flow usage. Firstly, global course sales revenue will be directly deposited onto the card. Then, individuals can freely convert KOI tokens to USDC on the card and use it at MasterCard merchants worldwide. Effectively connected to global payment interfaces, one of the benefits of having a crypto debit card is that you have full control over your cryptocurrency. You can reload or withdraw funds anytime and view your balance and transaction history online.

- The three main benefits are:
 - Accessibility: Crypto debit cards provide a simple and convenient way to use cryptocurrency without the need for a bank account.
 - Financial inclusion: Crypto debit cards promote financial inclusion by providing opportunities for those previously unable to access financial services through traditional banks.
 - Control: Users can easily reload, withdraw, and monitor their cryptocurrency balance and transaction history.

The annual fee, which KOI will absorb for esteemed KOI Crypto Master Debit Card holders in the first year.

- KOI aims to collaborate with more platforms in the future, offering additional tiers and highlighting the prestige of having this card for more NFT shareholders/members.

Note 4:

UKiss Technology ([Click](#)) aims to develop a digital ecosystem where users can easily authenticate themselves across Web2.0 and Web3.0 applications using their private keys.

- This ecosystem is designed for private keys protected by cold wallets or hardware wallets, which can generate and safeguard keys offline. Users can disconnect their private keys from the internet when not in use, thus avoiding round-the-clock attacks from hackers. Moreover, cold wallets ensure that keys are user-generated from the outset and not stored on any centralized servers.
- The UKISS decentralized security ecosystem provides users with a fundamental infrastructure, allowing them to manage their private keys and utilize them in Web2.0 and Web3.0 applications while maintaining digital sovereignty. Operating around a simple plug-and-play process facilitated by UKISS Hugware®, a hardware wallet with built-in identity recovery, users can securely manage their assets and data without requiring advanced network security knowledge.

A 引言

欢迎阅读 KOI Mobilize 的白皮书。我们旨在引领用户从Web2.0平台迈入Web 3.0，了解区块链运作。我们的使命是带领更多人进入Web 3.0生态系统，拥抱未来的区块链商业体系，实现一次性基本收入和不在职收入。我们相信，区块链教育+应用将成为未来30年的日常，因此我们创建了 KOI Web3SOC 社交网络，通过我们原来就日常的社交行为--参与社交，观看广告，分享经济，续而运用裂变营销，打造一个超级网络。助力大家建立未来生活并保持加密金融认知。

I. 市场差距和问题

谈及区块链，我们最直接的联想就是比特币，那是个跨时代金融产物。其实一般人对比特币的技术结构一知半解，不过根据2022年数据：全世界已有 3 亿加密货币所有者，而全球超过 18,000 家企业已经采用并且已经接受加密货币作为支付方式。然而我们关注的是~人口统计学记录世界人口于2022年11月15日突破80亿人。

附图现实世界人口的增长幅度，那是一份2017年报导附图，文章准确预测了2022年人口突破80亿。我们相信新世界人口将继续突破增加。(注1)

以企业角度看来，所有对接未来的崭新市场包含巨大需求。区块链记录加密钱包登记人数显示显著的市场差距，备受瞩目的特点是这个世界对 Web 3.0 技术的采用需求日益增长--从投资代币到使用加密货币、创建元宇宙和探索虚拟空间，潜力巨大的商业对接应用。然而，缺乏教育和理解构成了重大障碍。我们的主要目标是通过直接参与来解决这个问题，让大家了解区块链经济的扩容性，可以近距离在社交中持续发现，并且获取参与利润。

II. 互联网中心化被忽略的问题

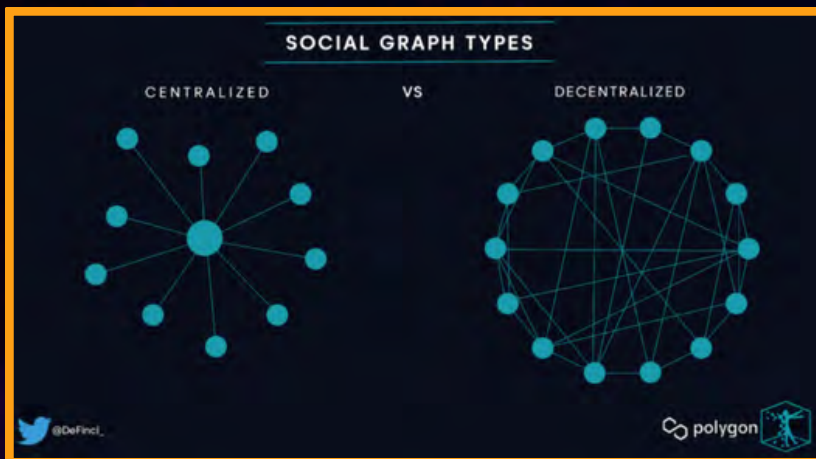

在Web1.0时代，互联网仅限于少数科技先驱和大公司，普通人难以参与。Web2.0时代带来了互联网平台的兴起，每个人都有机会创造内容，但互联网巨头垄断数据、利用用户成为“打工仔”。Web3.0时代将通过去中心化技术解决平台垄断问题，赋予用户数据控制权并让他们从中受益。区块链技术将为创作者提供更多机会和自主权，构建公平透明的互联网生态系统。KOL Mobilize关注互联网中心化的问题，如创作者变现脱节、平台价值不成比例、创作者收入集中。我们的目标是通过区块链科技，让大家直接参与，并获得利润。

的确，全球人口不断增加，同时我们注意到全球人们越来越依赖社交媒体获取新闻、资讯和娱乐。然而，中心化平台如Facebook、TikTok和Twitter因滥用用户数据和主观审核而备受批评。Web3.0解决方案已涉足该领域，竞争激烈的去中心化社交媒体平台正在积极应对这个21世纪的问题。由于可扩展性和大规模采用的障碍，转向去中心化社交媒体的可能性面临一些问题。

截至2023年4月，全球约有48亿社交媒体用户，随着廉价移动设备在全球的普及，用户数量每年都在增加。尽管社交媒体已成为日常生活的一部分，但当前形式几乎和它的好处一样容易上瘾且有害。现有网络面临着对主观审核、滥用用户数据、令人上瘾的算法和孤立的生态系统的批评。如果要真正“修复”社交媒体，需要进行完全的范式转变，而去中心化社交媒体解决方案则是我们实现真正社交领域民主化的最佳方案。

Web2.0公司将社交媒体作为单一产品，而Web3.0将社交网络概念扩展到多个层面。社交图谱是基础层，映射个人资料和粉丝联系。应用层允许用户消费内容并与社交图谱互动，类似于Web2.0的信息流。通过区块链，社交图谱成为个人资产，不再由单一实体控制。用户对社交媒体政策和算法不满，为去中心化社交媒体提供了市场机会。DeSoc能满足用户需求，并成为加密货币采用的催化剂，同时填补现有产品的缺口。

B 解决方案既商业机会

我们知道目前Web3.0主要围绕金融化和可转让资产。然而，许多主流经济行为(例如“无抵押贷款和建立个人品牌”)依赖于不可转让的社会关系，这些关系建立在信任基础上，并随着时间的推移而持续存在。2022年5月V神合著了一篇论文《去中心化社会，寻找Web3.0的灵魂》让灵魂绑定代币Soulbound Token这个词当时火了，即灵魂绑定代币，是和你的钱包(账户)绑定的不可转让的代币。任何线上线下的机构或个人都可以给一个钱包发放SBT，比如你毕业的学校、工作的企业、参加过的公益组织、贷款或参与流动性挖矿的DeFi平台、深度参与过的DAO组织等等，你的钱包可以收到各种各样的SBT。通过对整个‘中心化互联网被忽略的问题’和‘对区块链技术能够帮助建立个人品牌’的延伸了解。我们KOI Mobilize决定建立一个真正属于Web3.0世界的社交平台--KOI Web3SOC社交网络。

DeSoc协议提供了个人账户资料与数字内容的核心链接，通常使用NFT作为账户资料。所有账户和内容关系都是开放的，可供开发人员阅读，从而在社交图上构建前端应用程序和功能。这打破了传统平台的技术堆栈，扩大了创新潜力。增加开发人员和技术之间的表面积将增加新应用和功能的潜力，形成庞大的社交网络+学习网络。区块链产品建立在共识机制上，当商品价值大于价格时，会吸引更多人参与，这是我们帮助更多参与者的主要金融逻辑。

因此我们开创了观看并赚取(Watch-To-Earn)基于我们是一家充分的结合区块链教育+应用的公司，区块链的科技让我们建立了 KOI Web3SOC 社交网络，目标为三：

- 帮助有潜能的创作者完成他们的梦想
- 打造言论自由的社交平台
- 实现公平公正的分配机制

在互联网时代，用户创造了大部分价值，但大部分利润却流入了平台的口袋。一些国家已经开始反垄断行动，但另一些人提出了通过升级互联网来解决问题的想法，即Web3.0。在Web3.0中，用户创造价值的概念被强调，他们拥有自己产生的数据，并且区块链技术被视为点燃Web3.0革命的关键。

这将会是一张庞大的学习网络，当网络效应在达到一定的认购比例后，就是我们熟悉的临界值（注2）区块链产品是建立在共识机制上的，由于商品的价值是由用户群决定，这就意味着在一定数量的人订阅了服务或购买了商品后，由于价值大于价格，会有更多的人订阅服务或购买商品。这是我们能够帮助更多无论早期或后期参与者的底层的主要金融逻辑。

C 不同的商业模式带来不同的盈利模式

人类社会，无论时代和地点，都是围绕着共同生活而非独自生活的想法才建立起来的。互联网的普及率帮助了人类在互联的状态中创造了许许多多的沟通、机会与新商业模式。时间不会倒回，我们预见了一个互联网对接区块链，全新的社交商业模式：⇒SOCIAL MEDIA NETWORK

I. 异同

若以各大社交平台谈论商业模式，我们发现一切源自于科技创新，并结合社会不同需求。

Facebook

- 广告收入：Facebook通过在其平台上展示广告来获取大部分收入。广告商可以根据用户的兴趣、行为和其他数据定位其目标受众，并向其展示定向广告。这种广告模式使得广告主能够更精准地投放广告，提高广告的效果和回报率。
- 数据销售：Facebook通过收集用户的数据，并对其进行分析和加工，从而产生了大量有价值的用户数据。Facebook可以将这些数据出售给其他公司或机构，用于市场调研、广告定位、用户分析等用途，从而获取收入。
- 虚拟商品和游戏：Facebook的一些游戏和应用程序提供了虚拟商品和服务，用户可以通过购买这些虚拟商品和服务来增强游戏体验或提升社交互动。Facebook通过这些虚拟商品和游戏的销售来获取一部分收入。
- 收费服务：除了免费使用的基本功能外，Facebook还提供了一些付费的高级服务或功能，比如广告推广服务、高级统计分析服务等。通过向用户收取费用来提供这些付费服务，Facebook可以额外获取收入。

X

- 广告收入：X 通过在其平台上展示广告来获取主要的收入来源。与Facebook类似，X 允许广告主根据用户的兴趣、行为和其他数据定位目标受众，并向其展示定向广告。这种广告模式帮助广告主提高广告的精准度和效果，从而提高广告的回报率。
- 数据销售：X 收集和分析用户生成的数据，包括用户的发帖、互动、关注和兴趣等信息。这些数据对于市场研究、广告定位和用户分析等方面具有重要价值，因此 X 可以将这些数据出售给其他公司或机构，以获取收入。
- 推广服务：X 提供一些推广服务，包括推广帖子、推广账户和推广趋势等，使用户能够将自己的内容或账户推广给更广泛的受众。这些推广服务通常需要付费，为 X 提供了额外的收入来源。
- 数据许可费用：除了直接销售数据外，X 还可以通过向第三方许可其数据来获取收入。例如，一些研究机构、数据分析公司或金融机构可能会向 X 购买数据许可，以进行自己的分析和研究。
- 合作伙伴关系：X 还可以通过与其他公司或组织建立合作伙伴关系来获取收入。这些合作伙伴关系可能涉及广告合作、赞助活动、品牌推广等方面，为 X 带来了额外的收入来源。

YouTube

- 广告收入：YouTube通过在视频播放页面显示广告来获取主要的收入来源。这些广告通常以视频前贴、中贴或后贴的形式呈现，或者作为页面旁边的横幅广告展示。广告主可以根据用户的兴趣、行为和其他数据进行定向广告投放，从而提高广告的效果和回报率。
- 订阅服务：YouTube提供了YouTube Premium（原YouTube Red）订阅服务，让用户可以享受无广告观看视频、离线下载、背景播放等额外功能。用户需要支付每月一定的订阅费用来使用这些高级功能，为YouTube提供了额外的收入来源。
- 版权合作：YouTube与内容创作者签订版权合作协议，允许他们在YouTube平台上发布原创内容，并分享广告收入。这种合作模式使得优质内容创作者可以通过YouTube赚取收入，同时也为YouTube带来了更多的内容和用户流量。
- 联合营销和品牌合作：YouTube与各种品牌和广告主合作，推出联合营销活动、品牌推广视频等，从中获取赞助费用或合作收入。这种合作可以包括视频赞助、品牌推广、代言合作等形式，为YouTube提供了额外的收入来源。
- YouTube Premium原创内容：YouTube通过向YouTube Premium订阅者提供独家的原创内容来吸引用户订阅Premium服务。这些原创内容通常由知名内容创作者或YouTube签约制作人制作，为YouTube带来了额外的订阅收入和品牌曝光。

Instagram

- 广告收入：Instagram通过在用户的主页、故事、探索页面和搜索结果等位置显示广告来获取收入。广告形式包括图像广告、视频广告、滑动卡片广告等。广告商可以通过Instagram的广告管理平台进行广告投放，并根据目标受众的兴趣、行为和其他数据进行定向投放，提高广告的效果和回报率。
- 推广帖子：除了官方广告以外，Instagram还允许个人或品牌通过发布推广帖子来进行推广。这些推广帖子通常由知名的社交影响者或品牌大使发布，以吸引他们的粉丝注意并推广特定的产品或服务。这种合作方式通常会为发布推广帖子的用户带来一定的收入或奖励。
- 赞助内容：Instagram还提供赞助内容的机会，允许品牌与内容创作者或社交影响者合作，共同制作推广性内容。这些内容可能是与品牌相关的主题或产品，通过合作达到品牌曝光和推广的目的。品牌可以支付内容创作者或社交影响者一定的费用来进行合作，从而获得曝光和推广效果。
- 购物功能：Instagram的购物功能允许用户直接在平台上浏览和购买商品。品牌和商家可以在其Instagram商家资料中设置商品目录，用户可以通过点击商品标签或购物帖子直接购买商品。Instagram通过与商家的销售额分成来获取收入。
- IGTV和Instagram直播：IGTV和Instagram直播为内容创作者和品牌提供了另一种推广和赚钱的方式。他们可以通过在这些平台上发布长视频内容、举办直播活动或与粉丝互动来吸引关注和赚取收入。

TikTok（国外版抖音）

- 广告收入：TikTok通过在用户的视频流中插入广告来获取收入。这些广告通常以短视频的形式呈现，包括原生广告、品牌挑战、品牌合作等形式。广告商可以通过TikTok的广告平台进行广告投放，并根据受众的兴趣、行为和地理位置等进行定向投放。
- 品牌合作：TikTok与品牌合作，推出品牌挑战、活动和赞助内容，以提升品牌知名度和曝光度。品牌可以与TikTok合作推广他们的产品或服务，通过与用户互动的方式增加品牌的曝光和用户参与度。
- 礼物收入：TikTok通过虚拟礼物赠送功能来获取收入。用户可以购买虚拟礼物，并在直播、评论或私信中送给其他用户。TikTok会从用户购买虚拟礼物的收入中获取一定比例的分成。
- 社交电商：TikTok推出了社交电商功能，允许用户在平台上购买商品。品牌和商家可以通过在TikTok上开设店铺或发布产品链接来进行销售，用户可以通过点击购买按钮直接购买商品，TikTok通过与商家的销售额分成来获取收入。
- 平台服务费：TikTok可能还会收取一些平台服务费，例如提供高级账户功能、增加广告投放预算等服务。

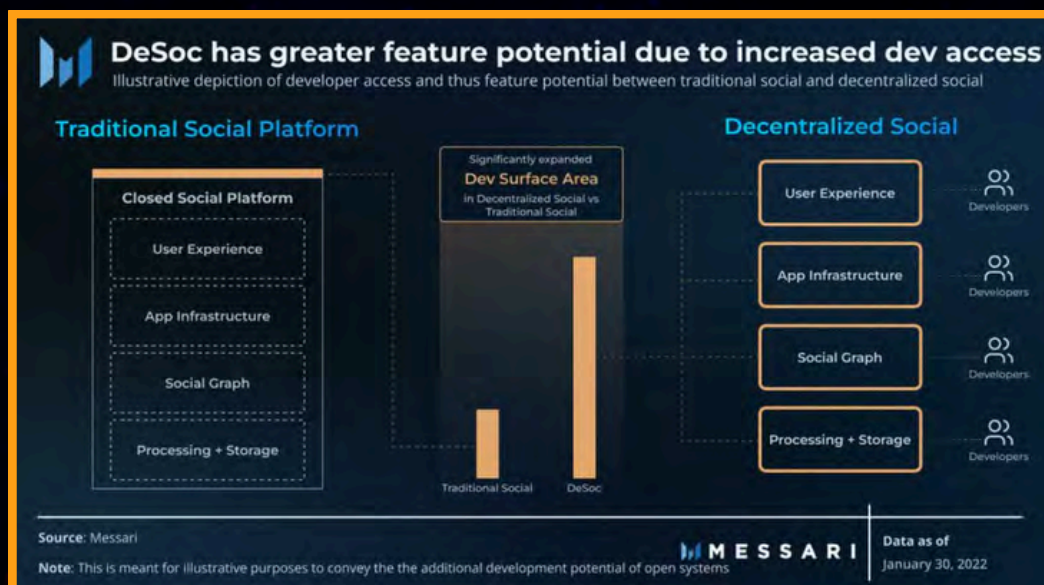

小红书 XiaoHongShu

- 广告收入：小红书通过在用户的内容流中展示广告来获取收入。这些广告通常以用户感兴趣的产品或品牌为主题，以视频、图文等形式呈现。广告商可以通过小红书的广告平台进行广告投放，并根据用户的兴趣、行为等信息进行精准定向投放。
- 品牌合作：小红书与各种品牌合作，推出品牌活动、主题活动和产品推广等内容，以提升品牌知名度和曝光度。品牌可以通过与小红书合作，与用户互动并向他们展示产品或服务，增加品牌的曝光和用户参与度。
- 礼物收入：小红书通过虚拟礼物赠送功能来获取收入。用户可以购买虚拟礼物，并在评论或私信中送给其他用户。小红书会从用户购买虚拟礼物的收入中获取一定比例的分成。
- 电商平台：小红书提供了一个社交电商平台，允许用户在平台上购买产品。品牌和商家可以在小红书上开设店铺或发布产品链接，用户可以通过点击购买按钮直接购买商品。小红书通过与商家的销售额分成来获取收入。
- 付费内容：小红书也提供了一些付费内容，例如付费阅读、付费课程等。用户可以通过支付一定费用来获取专属内容或服务，小红书通过这些付费内容获取收入。

Web2.0的商业模式主要依赖于广告收入、用户数据的收集和分析，以及平台服务的订阅费用。然而，这种商业模式存在着一些缺陷和不公平，例如用户数据的隐私问题、广告滥用问题以及平台对用户数据的垄断等。区块链技术可以为Web2.0带来一些改进和完善，以下是一些可能的方式：

- 区块链技术可以改善Web2.0的商业模式。通过去中心化的数据所有权，用户能够控制自己的数据，减少数据滥用和隐私问题。
 - KOI社交网络让DeSoc对接Web2.0现今红火的网红个人IP，让个人品牌可以建立真正属于自己付出的回报。可以在KOI Web3SOC 社交网络上尽情把自己的才艺上传，不分任何年龄以及种族，并且言论自由的创作自己的才艺，成为创作者的创业最佳平台。
 - 无论是创造帖子，视频，还是内容，都可以得到平台的用户打赏。这个阶段，我们让粉丝们以订阅形式支持创作者并享有特殊的回报。
 - 而建立了足够多的订阅户，创作者则可以在平台享有实际粉丝效应的支持。
 - 至于商家们，同样也可以通过KOI平台创建属于自己公司的忠实会员的支持。

KOI Mobilize通过帮助大家建立个人品牌，顺而打造间接获利的庞大受众。同时我们全力推广全球化区块链资产--KOI NFT(所有NFT都具备赋能)。

- 加密货币激励机制：通过区块链技术，可以实现对用户提供内容或参与社交网络的行为进行激励的机制。例如，平台可以使用加密货币奖励用户上传优质内容、参与社区讨论或分享有价值的信息，从而促进用户积极参与和贡献。
 - KOI 网络使用者则可以享有更多直接性的回馈。
- 透明和公平的广告模式：区块链可以提供透明和公平的广告模式，通过智能合约和区块链技术记录广告投放、点击和转化等信息，确保广告主和广告平台之间的交易公正可追溯。这有助于减少广告欺诈和提高广告投放效果。
- 去中心化的社交网络：基于区块链技术的去中心化社交网络可以减少平台对用户数据的控制和垄断，让用户更加自由地管理自己的社交网络，并有更多的选择权。这样的社交网络可能更加开放、透明和公平。

D 觉醒-商业5.0时代助推

-- 打造属于个人的品牌世界

解决方案既商业机会，不可否认的是，世界商业发展在近三四十年间发生了翻天覆地的变化，我们从产能低的时代正在朝向产能过剩的时代演进。

商业	思维模式	行为	盈利载体	市场
商业1.0	利润差价	以物易物的时代	实体产品	卖方市场
商业2.0	单品海量	规模生产带来的商业革新	传统互联网	第三方市场
商业3.0	增值服务	互联网时代的商业革新	产品增值	买方市场
商业4.0	号召力	生态协同带来的商业变革	新社交媒体	信用市场
商业5.0	万物互联	注重社会责任和可持续性发展	个人品牌+物联网	信息资源市场

- 商业1.0时代是指工业革命时期的商业模式，主要以生产为中心，产品的制造和销售是主要目标。公司主要关注产品的质量 and 效率，竞争主要是关于谁能提供更好的产品。
- 商业2.0时代是指20世纪初到20世纪末的商业模式。这个时期的关键是市场导向，企业开始更加关注市场需求和消费者的反馈。广告和营销成为了重要的手段，企业竞争更加激烈。
- 商业3.0时代是指互联网的兴起和普及时期，大约在20世纪90年代到21世纪初。互联网技术的发展改变了商业模式，使得企业可以更加灵活地与客户进行交流和合作。电子商务开始兴起，公司开始关注在线销售和数字化市场。
- 商业4.0是指数字化、智能化和自动化技术的发展时期，大约从21世纪初到目前。这个时期的关键是数字化转型，企业利用人工智能、大数据分析、物联网等技术来提高效率 and 创新能力，构建智能化的生产和管理系统。

- 商业5.0是指未来商业发展的趋势和方向，是在商业4.0的基础上对商业模式的再次革新。商业5.0强调人与人之间的合作和共享，注重社会责任和可持续发展，旨在实现商业与社会的共赢。设想的是，如果加入区块链运作，那将会增大商业5.0的安全及可塑性。

I. 人工智能时代的来袭与冲击

商业5.0通常指的是一种新的商业模式，强调人与人（P2P）之间的连接和合作，以及个性化、可持续性和共享经济发展。人工智能的普及化可以促使商业5.0更快落实，原因如下：

- 提升个性化服务：人工智能技术利用大数据和机器学习，能够深入理解用户的需求和行为，为他们提供更加个性化的产品和服务。这符合商业5.0强调的个性化服务理念，提升了用户体验和满意度。
- 促进共享经济：人工智能技术通过智能算法和平台匹配，能够实现资源的高效利用和共享，推动共享经济的发展。这与商业5.0中强调的资源共享和可持续发展理念相契合，有助于构建更加可持续的商业模式。
- 优化企业运营：人工智能技术帮助企业优化运营管理，提高效率和降低成本。通过自动化和智能化的生产流程、供应链管理和客户服务等环节，企业能够更快速地适应市场变化，实现商业5.0所追求的灵活性和敏捷性。
- 促进社区合作和协同创新：人工智能技术促进不同个体和组织之间的合作和协同创新。通过智能化的协作工具和平台，个体和组织能够更便利地分享知识、资源和经验，共同解决问题，实现共赢发展。

因此，人工智能的普及化可以为商业5.0的实现提供更强有力的支持和推动。人工智能的普及和发展确实会对一般工作产生一定程度的影响，一些重复性高、流程化的工作可能会被自动化和机器人替代，这会导致部分人面临失业或转岗的风险。然而，与此同时，人工智能也为个人打造个人品牌和商业5.0时代发展个人事业提供了新的机遇和平台：

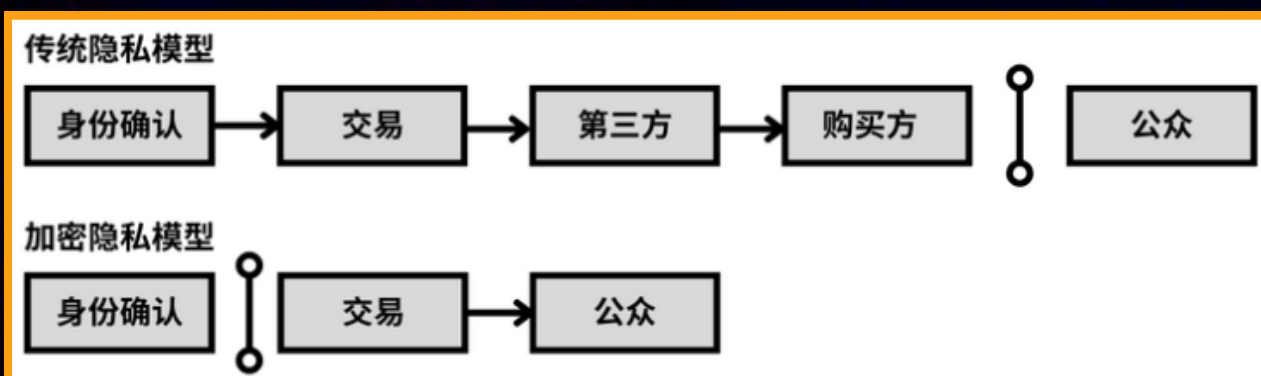

- 在人工智能时代，个人可通过数字平台展示独特价值，提供个性化服务，建立社区和粉丝基础，推广个人品牌。

II. 结合区块链金融的趋势

谈及趋势，日益成熟的互联网市场充斥着被中心化占据了那原来属于个人自由的数据。区块链技术崛起，这带出了商业5.0唤起的个人数据资产的自由觉醒。打造个人品牌是接下来的趋势，创建KOI社交网络，是让更多人能够通过结合商业5.0机制的契机，开始打造真正属于自己的区块链数据资产。

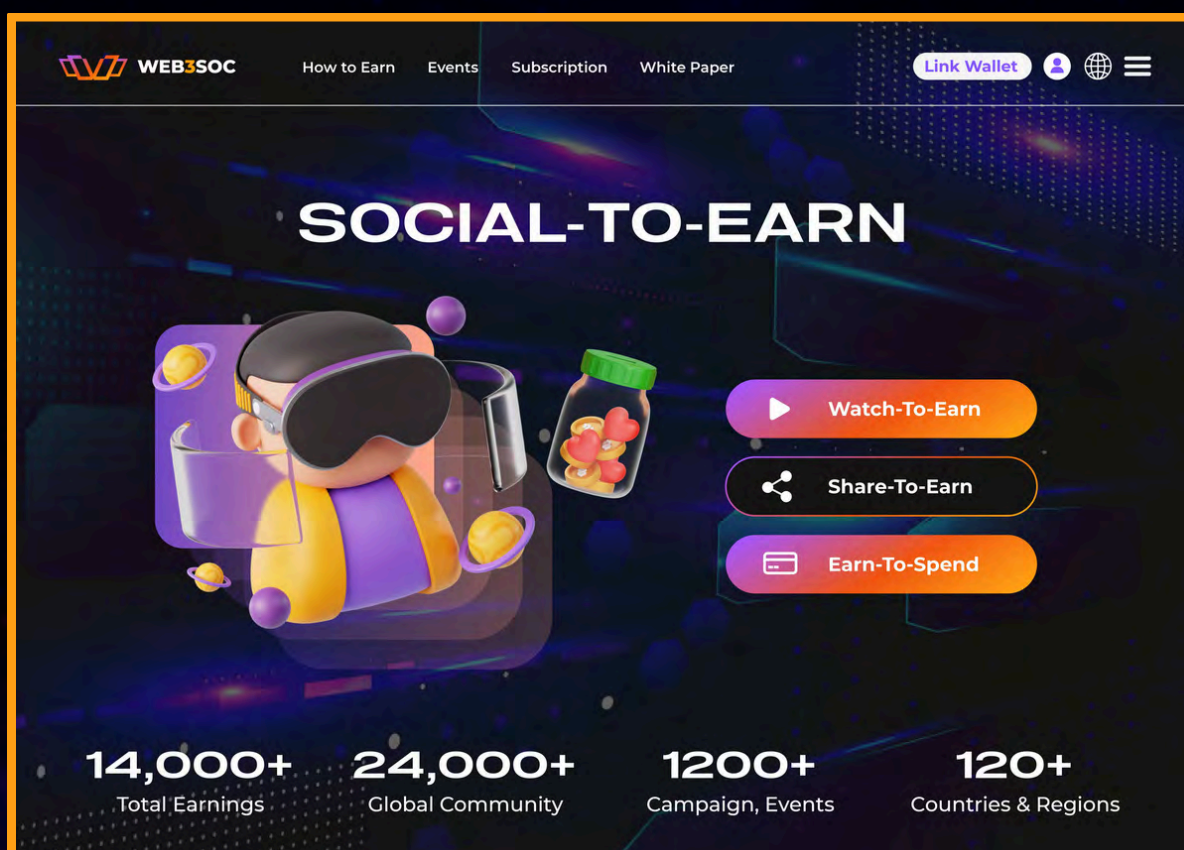

“你要成为怎么样的人，坚持下去，在KOI Web3SOC 社交网络总有人会发现你。”

E 创建-个人品牌的颠覆时代开启

过去传统隐私模型因为区块链科技的日益成熟，而达到了无需第三方的赋予信任层次，身份各自匿名确认，这意味了一个新时代的契机。区块链+品牌，KOI Web3SOC 社交网络 - 我们KOI Mobilize 将社交网络赋予价值，让每一个参与者都能在社交的同时找到自己与社会平行的对标价值。从此以后，我们预见那未来的商业可以很干脆。

I. 这世界每一个人都是很重要的

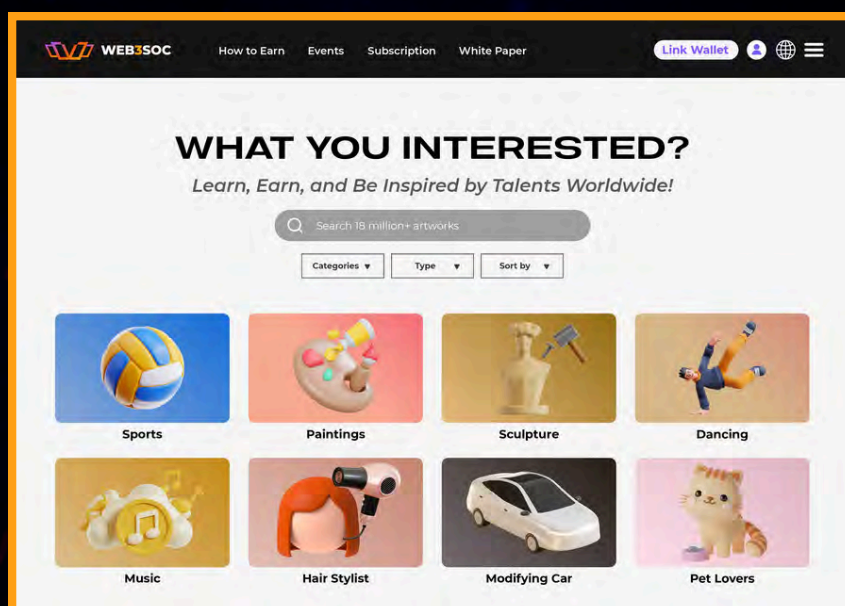

整个社交网络设计目标 -- 建立新时代拥有加密资产的生活习惯。

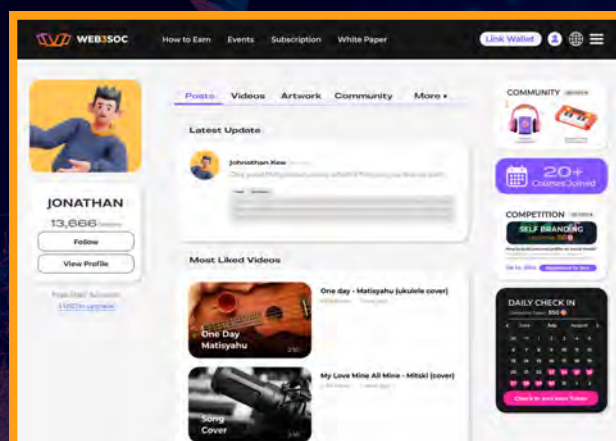

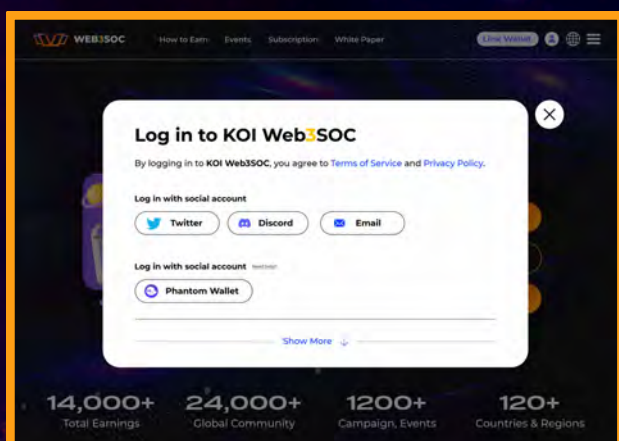

前期集客：

打造一个培养个人品牌的KOL社交网络，无论是商业模式的推陈出新--互联网的成熟，物联网的崛起，人工智能的卓越成长进度，根据即将开始的商业5.0我们清楚知道--个人品牌将会是其中一个爆发的领域。每个兴趣专业都将在每个对自己认真的经营下爆发。

对于才华，我们相信是稀缺的，并且能够于现今时代通过科技点对点的发挥极致。

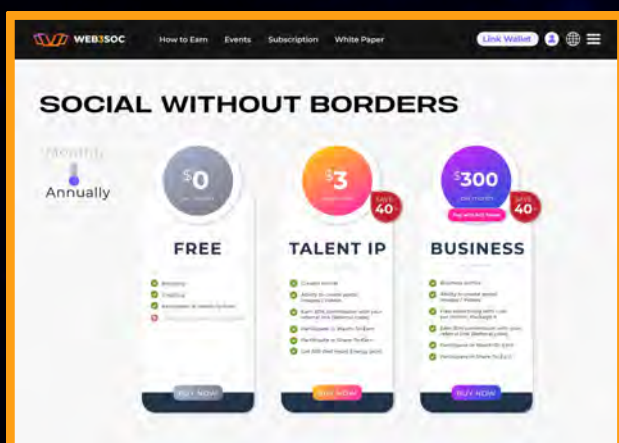

- 第一阶段，通过KOI Web3SOC 社交网络，帮助大家把自己的个人品牌建立起来。
 - 步骤1：注册
 - 可以使用Web2.0其他社交账户注册，实名认证并且在爱好对接栏选择自己的兴趣专业。
 - 可以邀请或添加自己社交网络及电话名单上的朋友加入平台，每成功邀请直接奖励10红心能量。
 - 可以直接使用Phantom Wallet开启KOI Web3SOC 社交网络的旅程，直接奖励30红心能量。
- (机制将推送你兴趣专业的个人言论或视频于你的公共活动池。)

步骤2：可以自由选择：

KOI Freer 免付费用户：

可以自由浏览一定版面。

- 每日打卡可获 1 红心能量值。
- 1 次Watch-To-Earn，可选择消耗 6~50不等红心能量值。

红心能量值数量	以KOI代币购买	以SOL购买
500 可赚取≤5000 KOI Token	5美元等值KOI • 赠送10红心能量值	5美元等值SOL
2500 可赚取≤25000 KOI Token	25美元等值KOI • 赠送60红心能量值	25美元等值SOL
5000 可赚取≤50000 KOI Token	50美元等值KOI • 赠送150红心能量值	50美元等值SOL

KOI 红心能量值
Heart Power：

红心能量值购买配套：

- 可以 · KOI代币或SOL购买

注：以上图表仅作第一个代币减半前红心能量值兑代币计算

【2,500,000,000 KOI 代币 Watch to Earn】

代币分配50%拥有10次减半机制，每减半消耗代币就开始减半一次，代币就会产生稀缺，让代币价格一直不断往上升，让早期步道者可以边看广告边赚钱。

【充值红心看广告换取代币】

早期玩家买入价格：

5USDC = 得到500个红心，可通过观看广告赚取5000 KOI Token
越早参与Watch To Earn的步道者得到的Token越多。

KOI PRO (Talent IP)

月配套 USD 5/月

年配套 USD 3/月

(节省 40%)

拥有属于自己的发表平台，选择自己所属兴趣专业，公共活动池的动态附有自己的追踪按钮，为自己做个认真决定也方便日后无论是个人或商家对接。1个Click等于增加1个View，每10000 Viewers，发表台等级将增加，这直接公平影响不同兴趣专业排名。

KOI Business

月配套 USD 500/月

年配套 USD 300/月

(节省 40%)

广告与宣传是商业必要部署，成为KOI Web3SOC 社交网络长期商家，不仅享有平台长期曝光宣传，订阅也包含1个价值500美金的广告宣传。

- 第二阶段，开启观看并赚取(Watch-To-Earn)
 - 非强制但建议绑定Phantom或任何SOL Wallet就可开始参与Watch-To-Earn或任何链上活动。
 - 观看广告必须使用红心能量，每观看1次消耗6~50红心能量值不等。
 - 获取红心能量方式：
 - 每日打卡：1 红心能量值
 - 推荐码：10 红心能量值
 - 购买：500~5000 红心能量值
 - 观看并赚取后的代币数额，只要一经绑定SOL Wallet，利润可被分配至钱包地址或者分配到个人加密货币借记卡(Crypto Debitcard)上。
- 第三阶段，接通商家与个人品牌(KOI Talent IP)点对点关系。

KOI使用SOLANA Chain打造属于KOI的内环生态，KOI Token成为Utility Token是运作目标，今后无论市场上升下跌，币价因有基本的需求价值而依然运作。

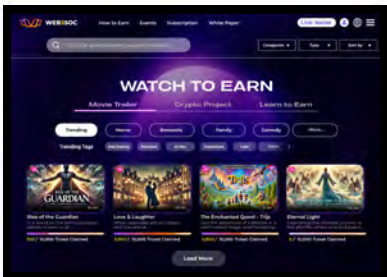

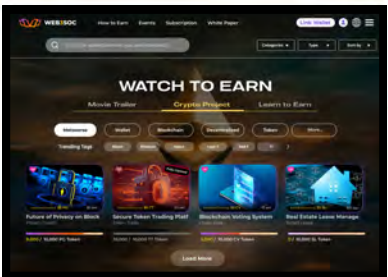

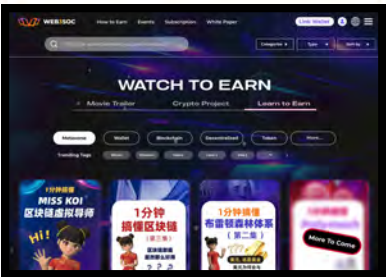

F

变现--颠覆的商家广告及配套

向来传统网络为参与者设计规避广告的方法，多数是订阅，这使得平台订阅者越多既产生越多的商家广告，但如果广告的结果是宣传，那么顺应商家更加达到效果，我们于第二阶段直接开放广告空间(Advertisement Space)，这空间实践观看并赚取 (Watch-To-Earn)。

- 条件很简单：拥有足够红心能量值，既能进入，寻找要看的广告，消耗6~50红心能量值，点击至播放完毕后，点击离开广告，立即可得不同代币的奖励。
- 特别推广：与电影发行方合作，观看电影预告片并分享即可获得电影票折扣卷
- 广告分成3种类型：

模式	内容	奖励
商家广告	电影预告片	电影票折扣卷
	商家各种产品类型广告	KOI 代币Token
项目方广告	项目方介绍影片	不同项目方不同代币Token
KOI教育广告	Miss KOI区块链教育广告 & 所有认证级别教育课程	KOI 代币Token

商家广告	项目方广告	KOI教育广告
		

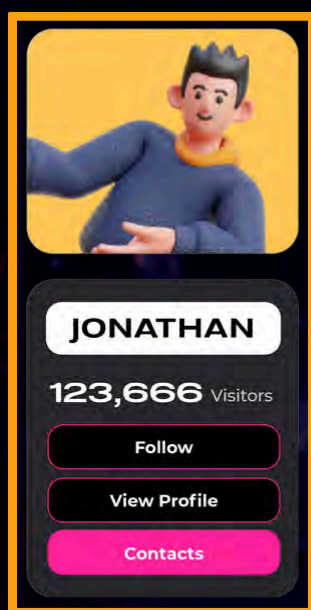

I. 学习并赚取(Learn-To-Earn) VS 虚拟数字人 IP — Ms. KOI

Ms. KOI是我们的区块链课程的虚拟导师，概念课都由Ms. KOI教导。

- 课程中丰富的专业区块链知识和独特的教学风格使学习变得有趣。公司定位以品牌意见虚拟领袖(Virtual KOL)的先锋定位作为设计两位虚拟导师的初始理念，持续营销加上经历时间，那将会成为公司独一无二的资产。
- 世界各地都有学习区块链这新应用知识的需求，为此，所有课程都以虚拟数字导师（Virtual IP）动画电影教学模式进行，为了统一所有的教学，我们将更便利复制不同国家不同传统服装的虚拟数字导师，提升全球化的品牌公信力，创造公司价值。
- Learn-To-Earn学习并赚取--我们认为学习是所有区块链系列教学，皆可以通过消耗红心能量值去观看影片学习，并且赚取代币。
- Learn-To-Earn是个全球计划，我们配合国家特许经营授权【International Licensing of Countries】同步推广进行。
- 注：其他学术领域，KOI也将一步步涉猎其中，帮助更多的一般人能够向海内外许多思想达人或各领域大师学习。个人品牌时代，无论文凭或个人简历(Portfolio)，链上建立更加真实。

II. 才艺并赚取(Talent-To-Share) 自然地创造有灵魂的用户

对标受众人群基本庞大，就像一开始就提及根据2022年数据：全世界已有 3 亿加密货币所有者，而全球超过 18,000 家企业已经采用并且已经接受加密货币作为支付方式。然而我们关注的是~人口统计学记录世界人口于2022年11月15日突破80亿人。

Web3.0这是一个未被全面开发的领域，那也绝对是一片全新的风口，只不过一般人比较难以个人姿态进入Web3.0发展。就像我们不可能回到3G时代，于是我们打造了Talent- To-Share，让大家不错过这个风口--打造个人品牌，建立自己的信誉资产，进而延伸至区块链资产。

打造一个商业品牌需要时间，打造个人品牌也一样，用心认真经营是必备原料，平台是培育品牌的地方，所有KOI (Talent IP)注册都备有Contacts键，那是一个链接商家业配或带货的决定，也启动了平台系统点对点的链接，接下来就等开花结果。

- 如果才华是一种价值，KOI社交网络平台呼吁广大社区看重自己的才华，并且认同自己，在区块链年代，这价值能够通过科技体现出来。
- 所有个人品牌只要开放自己的Contacts键，达到100,000观看量(Visitors)，将直接推送商家对接。
- 所有个人品牌都可承接项目方广告。

KOI Web3SOC 社交网络的用户--KOI Freer 除了可以观看并赚取(Watch-To-Earn)之外，KOI (Talent IP)还可以通过Visitor对发布视频的观看量增加KOI代币收入。

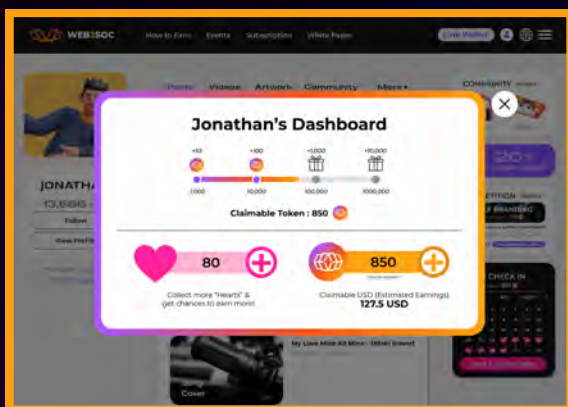

III. 国家特许经营授权

【International Licensing of Countries】

全世界的人都需要社交并赚取(Social-To-Earn)，各国各大企业已经陆续布局区块链底层技术及应用，随着世界人口的增长，科技的进步，KOI专注未来新的技术和趋势。其中，区块链、人工智能、大数据分析、虚拟现实和增强现实,我们结合并打造了KOI S2B2C商业模式。故此，同一时间，KOI针对有效全球市场开发策略，将发出国家特许经营授权【International Licensing of Countries】。这将会是公司让全世界认识KOI的资源杠杆管道之一，而全球于KOI Web3Soc 社交网络的社交并赚取(Social-To-Earn)那是公司打造的商业共识。这其中包括帮助该国人民通过社交：

- 观看并赚取(Watch To Earn)
 - 商业广告--商家广告/项目方广告/教育广告
 - 才艺并赚取(Talent-To-Earn)--所有个人品牌可凭自己的认真与努力让大家看到。
- 分享并赚取(Share-To-Earn)-- 分享一样使用红心能量值。将自己认同的影片分享，帮助创作者增加曝光度同时自己也可以赚取额外代币。
- 赚取并消费(Earn To Spend)

注：国家特许经营权拥有人则意味着将有长期不在职营销收入的投资回报。

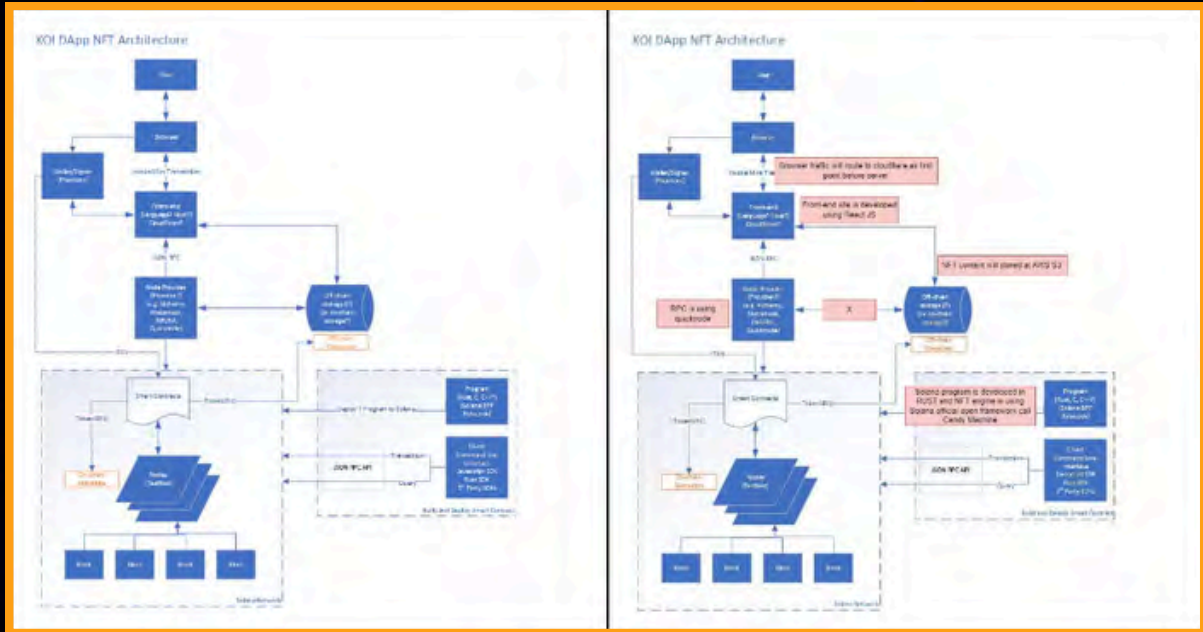

注：于KOI Web3SOC 社交网络赚取的KOI代币：

- 使用Web2.0其他社交账户注册用户：可以按照教程安全Phantom钱包开户，然后转币兑现。
- 使用Phantom钱包用户：可以直接转入Phantom钱包并于二级市场销售，或申请直接转提加密货币借记卡(Crypto Debit Card)直接消费，或存储UKISS Hugware wallet作质押，赚取更多代币。

G

拥有-初始(Genesis) NFT

KOI DApp NFT 架构是以分布式应用程序（DApp）的形式设计和实现的，具体包括以下几个方面：

- 智能合约：使用智能合约来定义 NFT 的创建、交易和所有权转移规则，以及其他相关的逻辑。智能合约通常基于区块链平台（如以太坊）上的 Solidity 或类似的智能合约语言编写。
- 存储层：存储 NFT 的元数据和文件，包括图像、音频、视频等内容。这些数据通常会存储在去中心化的存储系统或 IPFS（InterPlanetary File System）等分布式存储系统中。
- 用户界面：提供用户友好的界面，使用户能够创建、购买、销售和转移 NFT，以及查看其所有权和元数据。这可能包括 Web 应用程序、移动应用程序或桌面客户端等。
- 钱包集成：允许用户管理其加密货币钱包，并与智能合约进行交互，执行 NFT 相关的操作，如购买、销售和转移。
- 元数据标准：定义 NFT 的元数据标准，以确保不同的 DApp 和市场之间可以互操作，并为 NFT 提供一致的显示和交互体验。
- 市场和交易平台：提供一个市场或交易平台，让用户可以在其中展示、出售和购买 NFT，并进行相关的交易和竞拍。

I. 赋能完美延伸--加密货币借记卡

KOI Mobilize于初始阶段既推出赋能Genesis NFT：

【NFT 资讯】

Genesis NFT 总共500张 (每张1000USD)

早期购买者特别红利：

- 首100位 NFT 拥有者，每位将获得 400,000枚 KOI 代币
- 一张加密货币借记卡
- 每月Web3SOC充值总额的5%利润

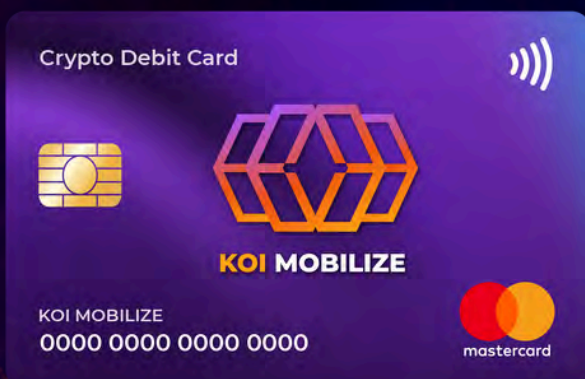

标准分配：

- 其余 400 名 NFT 持有者将每人获得 100,000 枚 KOI 代币
- 一张加密货币借记卡
- 每月Web3SOC充值总额的5%利润

股东盈利算法：

$$\begin{aligned}
 &1,000,000 \text{ (充值次数)} \times 5 \text{ 美元 (充值数额)} \\
 &= 5,000,000 \text{ 美元} \times 5\% \text{ (利润分配)} \\
 &= 250,000 \div 500 \text{ (Genesis NFT)} \\
 &= \text{节点股东可500美元每个月}
 \end{aligned}$$

II. 赚取并消费(Earn-To-Spend)

GENESIS NFT于KOI持有人类似股权持有人，享有短期及长期分红赋能。另外公司与Mastercard合作，一并打通支付渠道并允许NFT持有人通过附送的加密货币借记卡Crypto Debit Card(注3)，将KOI代币卖给公司回收。

为了方便用户出入USDC，提供此便利能够减少代币于二级市场抛压。

- 每张加密货币卡的年费(信用卡公司收取)，公司将代还第一年，后续可用红心支付。
- 投资人可考量购买代币质押，以获取更多代币利润。
- 可以随时于接受Mastercard的公司进行线上线下的支付。

加密货币卡是传统借记卡的数字版本，用于与数字货币进行交易。加密卡的主要好处是它能够立即使用加密货币支付，并且在全球任何地方进行任何形式的购买时无需任何进一步的步骤。KOI推出这3种NFT，属于项目前期WEB3.0网络合作伙伴属性，除了增加节点维护，拥有此阶段NFT也将拥有KOI社交网络长期利润绑定。

III 安全考量

努力过后拥有可以产生现金流的资产型投资是KOI Mobilize带领大家于KOI Web3SOC 社交网络建立个人品牌的主要目的-- 认识区块链未来并拥有区块链资产后，最后安全收纳区块链资产是非常重要的环节。我们对区块链资产安全的高层考量促成了与UKiss Technology 公司的合作，我们共识目标是开发一个数字生态系统，在这个生态系统中，用户可以利用其私钥轻松实现跨 Web2.0 和 Web3.0 应用程序的自身份认证。

属性：每一个UKISS Hugware Wallet (注4)都具特别系列号码，对应NFT。

- 灵魂绑定(Soul Binding)功能:
 - 拥有此硬件钱包，所有KOI NFT与Token都可以安全收纳这里。
 - KOI Token可以质押并将随机空投KOI硬件钱包地址。
 - 可收取任何加密资产。

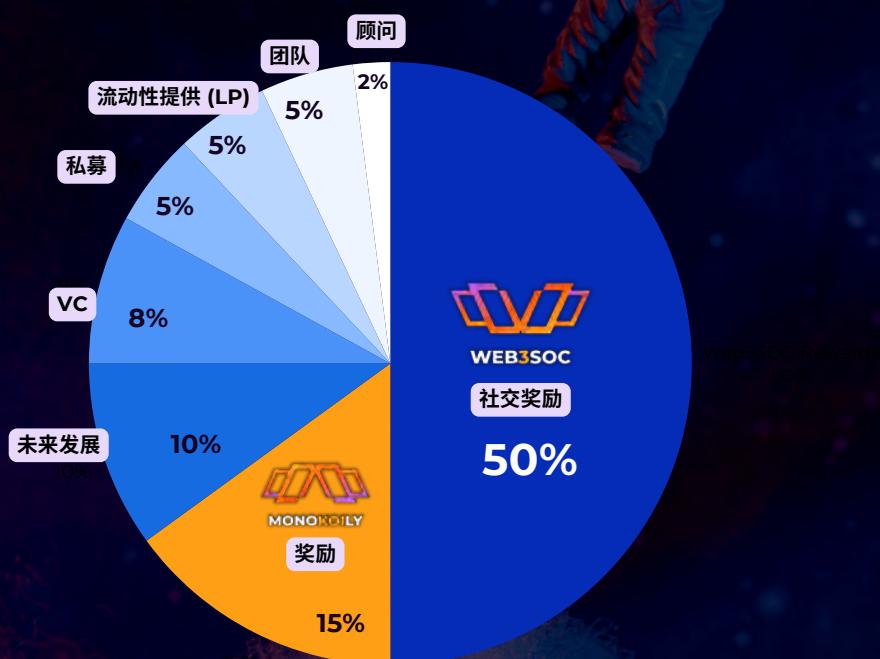

H KOI路线图

KOI Web3SOC 社交网络达到1000万用户订阅是公司2026目标，平台让广告利润80%从商家直接流入用户钱包，颠覆Web2.0平台操作的同时，也直接建立了内部流量数据。

- 2024 Q2: KOI 私募阶段，研发KOI DAPP，代币空投活动
- 2024 Q3: 研发Telegram小游戏 - MONOKOILY，升级KOI官方网站第二版本，推出KOI DAPP测试版本
- 2024 Q4: 推出KOI官方网站第二版本，推出MONOKOILY测试版本
- 2025 Q1: 代币上市交易所，推出MONOKOILY，用户集流 - 目标MONOKOILY 100万用户
- 2025 Q2: 推出初版KOI Web3SOC - 以电影推广为主，接通商家与个人品牌点对点关系，开始引入广告商，目标Web3SOC达到100万用户
- 2026: 目标Web3SOC达到1000万用户
- 2027: 目标Web3SOC达到1亿用户

I KOI代币生态圈分配

KOI代币分配的部分，透明地说明项目如何分配和使用其代币。包括以下几个方面：

50% - Web3SOC社交奖励

社交DAPP -

- 主要借联盟推广加快扩展速度

【2,500,000,000 KOI 代币 Watch to Earn】

代币分配50%拥有10次减半机制，每次代币开始减半一次，红心能量值消耗所换取代币就会减少，让代币价格一直不断往上升，让早期步道者可以边看广告边赚钱。

【充值红心能量值看广告换取代币】

早期玩家买入价格：

5USDC = 得到500个红心，可通过观看广告赚取5000 KOI Token

越早参与Watch To Earn的步道者得到的Token越多。

15% - MONOKOILY奖励

Monokoily 是一款基于 Telegram 的小游戏，利用该平台庞大的用户群体进行推广和吸引用户。该游戏旨在帮助人们了解现今的金融体系，并学习个人理财规划。经验证小游戏市场前景广阔，在 Monokoily 上积累的用户也将被转移到 Web3SOC，为新平台提供第一批大量用户。

10% - 未来发展

用于推动项目的长期发展和增长。

8% - VC

- 锁仓3个月后解锁25%，往后每3个月解锁15% (18个月完全解锁)

5% - 私募

代币销售 -

- Genesis NFT 500持有人

5% - 流动性提供 (LP)

提供区块链网络中，数字资产（如加密货币）买卖的能力以及市场的流动性。

5% - 团队

锁3月，后60个月时间解锁。

2% - 顾问

KOI邀请了区块链项目顾问级人物参与，以期更优越项目的整体呈现。

- 第3个月解锁25%
- 第6个月解锁15%
- 接下来每3个月解锁10%，直到第24个月完全解锁

J

核心价值

KOI Mobilize秉持5大中心文化经营并打造公司价值：

- 增值：我们于任何的决策上务必环绕添加价值的理念上进行。
- 成长：我们勇于行动，找到增加公司市场价值的最佳途径。
- 颠覆：我们坚持新时代的颠覆思维，创造新时代的独特产品造福区块链生态参与者。
- 热情：我们时时前进创新，脸上时时挂着微笑。
- 正直：我们以用户为中心，我们始终保持诚实，开放和道德。

K

愿景与使命

- 愿景：通过【区块链生态】创造不在职收入与区块链资产，帮助大家能在高通货膨胀体系里过一个该退休就退休的“无忧生活”。
- 使命：我们的使命是通过区块链奖励机制建立一个安全、透明的价值交换网络。

M 风险和挑战

区块链投资的风险包括市场波动、技术风险、安全漏洞、监管风险和诈骗风险。价格可能剧烈波动，技术可能面临问题，安全漏洞可能导致资金损失，监管不确定性可能影响市场，而诈骗活动也屡见不鲜。

N 法律和合规性

马来西亚对区块链项目的法律及合规性有严格要求。根据马来西亚证券委员会（SC）发布的《数字资产的法规框架》，数字资产交易平台（DAX）需获得许可，并遵守反洗钱（AML）和反恐怖主义融资（CTF）法规。此外，马来西亚也通过《数字经济法》来规范数字经济和区块链技术的发展。此法规定了数字资产服务提供商（DASP）的要求和义务，以确保其合法性和合规性。马来西亚政府鼓励区块链项目的发展，但强调必须符合法律法规，并保护投资者利益。因此，任何在马来西亚进行区块链项目的实施都必须遵守相关法律法规，并获得必要的许可和批准。

注解

注1：

世界人口增长率的数据通常来自国际组织和机构，包括联合国、世界银行、世界卫生组织等。世界人口增长率。数据来源(Click)

注2：

临界值（英语：Critical point）：临界值是指物体从一种物理状态转变到另外一种物理状态时，某一物理量所要满足的条件，相当于数学中常说的驻点。我们可以通过临界点求最值，从而获得事半功倍的效果。

- 网络效应 Network effect（也称网络外部性 network externality或需求方规模经济 demand-side economies of scale），是一个经济学和商业方面的术语，用于描述对于一个产品（或服务），每增多一名用户，都会对该产品的其他用户产生新的价值。当网络效应出现时，产品（或服务）的价值，会随着使用该产品（或服务）的人数的增加而增加。

注3：

KOI的Crypto Master Debit Card (Click)让会员有更直接的现金流使用，首先是全球课程销售收入将直接汇到卡上，之后让大家自由将KOI代币于卡上转售为USDC，并且随时于世界各地接受MasterCard的商家使用。有效地连接到全球支付接口，拥有加密借记卡的好处之一是您可以完全控制您的加密货币。您可以随时充值或提现，并在线查看您的余额和交易记录。

- 三大主要好处：
 - 可访问性：加密借记卡提供了一种简单便捷的使用加密货币的方式，无需银行账户。
 - 金融包容性：加密借记卡促进金融包容性，为之前无法通过传统银行获得金融服务的人提供了机会。
 - 控制：用户可以轻松地充值、提现并监控他们的加密货币余额和交易记录。

年费：KOI将为尊贵的KOI Crypto Master Debit Card持有人吸纳第一年年费。

- KOI的目标是将来与更多平台合作，会分成更多级别，突显更多NFT股东/会员持有此卡的尊贵。

注4：

UKiss Technology (Click) 公司目标是开发一个数字生态系统，在这个生态系统中，用户可以利用其私钥轻松实现跨Web2.0 和 Web3.0 应用程序的自身身份认证。

- 这个生态系统是为有冷钱包或硬件钱包保护机制的私钥而设计的，这些钱包可以离线生成并且保护私钥。用户可以在不使用私钥时断开私钥与互联网的连接，从而规避来自黑客的全天候攻击。此外，冷钱包还确保了私钥从一开始就是用户生成的，并未存储在任何中心化服务器中。用户可以在不使用私钥时断开私钥与互联网的连接，从而规避来自黑客的全天候攻击。此外，冷钱包还确保了私钥从一开始就是用户生成的，并未存储在任何中心化服务器中。
- UKISS 去中心化安全生态系统将为用户提供一个基本的基础架构；依托这个架构，用户可以管理自己的私钥并且在Web2.0 和 Web3.0 应用程序中运用其私钥，从而在保持连接同时维持数字主权。UKISS 生态系统围绕着一个简单的即插即用流程运转，这个流程经由 UKISS Hugware®实现，后者是一款带有自身身份认证恢复程序的硬件钱包。只要将这个钱包与整个生态系统上的服务连接起来，即使是不具备高阶网络安全知识的用户，也能将资产和数据安全掌握在自己手中。
